Chapter 1: Addition Facts and Strategies

ENRICH WORKSHEETS

UNIT 1: NUMBER AND OPERATIONS

Chapter 1: Addition Facts and Strategies

1.1 More Addition Sentences .............. EW1
1.2 A Maze to Count On .................... EW2
1.3 Mystery Number ......................... EW3
1.4 A Teen Number Chart .................. EW4
1.5 Clues for Sums .......................... EW5
1.6 Fix It .................................. EW6
1.7 Some Sums ............................... EW7
1.8 Problems, Problems .................. EW8

Chapter 2: Subtraction Facts and Strategies

2.1 What is the Difference? .............. EW9
2.2 Hopping Back to 0 ...................... EW10
2.3 Making Fact Families ................. EW11
2.4 Which Number Goes Where? ......... EW12
2.5 Missing Addends ....................... EW13
2.6 Finish the Problem .................... EW14

Chapter 3: Place Value to 100

3.1 How Many Points? ..................... EW15
3.2 Get Your Pencils Here ................. EW16
3.3 Least and Greatest .................... EW17
3.4 Follow the Lines ....................... EW18
3.5 More Riddles .......................... EW19
3.6 Match the Models ..................... EW20
3.7 Planning a Picnic ...................... EW21

Chapter 4: Number Concepts and Patterns

4.1 Color That Train ...................... EW22
4.2 Digit Arrangements ................... EW23
4.3 Least to Greatest, Greatest to Least .... EW24
4.4 Be a Basketball Detective .......... EW25
4.5 Even Sums, Odd Sums ............... EW26
4.6 More About Skip-Counting .......... EW27
4.7 Patterns and Problems ............... EW28
4.8 Two Number Patterns ................. EW29

UNIT 2: 2-DIGIT ADDITION AND SUBTRACTION

Chapter 5: Explore 2-Digit Addition

5.1 What Number Am I? .................. EW30
5.2 Story Problem Fun ..................... EW31
5.3 Write the Addition Problem .......... EW32
5.4 What is the Problem? ................. EW33
5.5 Find the Errors ....................... EW34
5.6 Arrange the Digits .................... EW35

Chapter 6: 2-Digit Addition

6.1 How Does It Add Up? ................ EW36
6.2 The Lost Digits ....................... EW37
6.3 How Many Could There Be? .......... EW38
6.4 Estimation Challenge ................ EW39
6.5 Mystery Addends ..................... EW40
6.6 Missing Points ....................... EW41
6.7 Which Toys? ......................... EW42

## UNIT 3: DATA, PROBABILITY, MONEY, AND TIME

### Chapter 8: 2-Digit Subtraction
- 8.1 Fill in the Blanks.................... EW49
- 8.2 Two-Step Problems.................. EW50
- 8.3 Jumbled Numbers.................... EW51
- 8.4 The Same Difference................. EW52
- 8.5 Add to Subtract...................... EW53
- 8.6 Find the Mistake..................... EW54
- 8.7 Use the Method....................... EW55
- 8.8 Where to Start?...................... EW56
- 8.9 A Pair of Problems.................. EW57

### Chapter 12: Use Money
- 12.1 Fruit Stand.......................... EW75
- 12.2 Saving Coins......................... EW76
- 12.3 Changing Amounts.................. EW77
- 12.4 On the Menu.......................... EW78
- 12.5 Make a Dollar....................... EW79
- 12.6 Correct Change..................... EW80

### Chapter 13: Time
- 13.1 Two Hours at the Park.............. EW81
- 13.2 Time Riddle.......................... EW82
- 13.3 Time at the Zoo..................... EW83
- 13.4 School Day........................... EW84
- 13.5 Time to Estimate.................... EW85
- 13.6 Busy from A.M. to P.M.............. EW86
- 13.7 Fair Time............................ EW87
- 13.8 World Traveler...................... EW88

## UNIT 4: GEOMETRY, PATTERNS, AND MEASUREMENT

### Chapter 14: Solid Figures
- 14.1 Solid Colors.......................... EW89
- 14.2 Number Cube Net.................... EW90
- 14.3 Solid Figure Puzzle................ EW91
- 14.4 Solid Figure Riddles............... EW92
- 14.5 Take It Apart....................... EW93
- 14.6 Making Models...................... EW94

### Chapter 15: Plane Figures and Spatial Sense
- 15.1 Match Plane Figures............... EW95
- 15.2 Plane Figure Puzzle............... EW96
- 15.3 Two Ways to Top It................. EW97
- 15.4 Building Figures.................... EW98
- 15.5 Use the Clues....................... EW99
- 15.6 From Start to Finish............... EW100
- 15.7 Figure Hunt.......................... EW101
- 15.8 Half and Half....................... EW102

### Chapter 16: Patterns
- 16.1 Patterned Scarves............... EW103
- 16.2 Gridding Patterns.................. EW104
- 16.3 Patterned Pizzas.................... EW105
- 16.4 Pattern Match....................... EW106
- 16.5 How Does the Pattern Grow?....... EW107
- 16.6 Field Day............................ EW108
- 16.7 Coin Collectors..................... EW109
Chapter 17: Length, Perimeter, and Area
17.1 Compare to Measure ....................... EW110
17.2 Best Estimate .................................. EW111
17.3 Lengths of Objects ........................ EW112
17.4 Length Riddles ................................. EW113
17.5 Color the Vegetables ....................... EW114
17.6 Centi-Meter Fever ......................... EW115
17.7 Draw It ......................................... EW116
17.8 Square Units .................................. EW117

Chapter 18: Weight, Mass, Capacity, and Temperature
18.1 Ounces and Pounds ......................... EW118
18.2 Measuring Mass ............................... EW119
18.3 Fruit Punch ................................ EW120
18.4 Capacity Search ............................. EW121
18.5 Changing Temperatures .................. EW122
18.6 Measurement Search ....................... EW123

UNIT 5: FRACTIONS AND GREATER NUMBERS
Chapter 19: Fractions
19.1 Make a Quilt ................................. EW124
19.2 Pizza Party ................................ EW125
19.3 Missing Problems .......................... EW126
19.4 Same Amounts ............................... EW127
19.5 Whole Pizzas ................................. EW128
19.6 Three Different Parts ..................... EW129

Chapter 20: Place Value
20.1 Greatest and Least ......................... EW130
20.2 Showing Numbers ......................... EW131
20.3 Value Clues ................................ EW132
20.4 Cross-Number Puzzle ..................... EW133
20.5 Find the Ways ............................... EW134
20.6 What Coins? ................................ EW135

Chapter 21: Compare and Order Greater Numbers
21.1 More or Less ................................ EW136
21.2 Greater, Less, or Equal? ............... EW137
21.3 The Middle of the Train ................. EW138
21.4 Hundreds of Points ....................... EW139
21.5 Count by Fives, Count by Tens ........ EW140

UNIT 6: 3-DIGIT ADDITION AND SUBTRACTION, MULTIPLICATION AND DIVISION
Chapter 22: 3-Digit Addition
22.1 Hundreds in Your Head .................. EW141
22.2 Scrambled Digits ......................... EW142
22.3 3-Digit Decisions ......................... EW143
22.4 What Are the Numbers? ................. EW144
22.5 Use Information ......................... EW145

Chapter 23: 3-Digit Subtraction
23.1 How Many Hundreds? .................. EW146
23.2 Disappearing Digits ....................... EW147
23.3 Regroup Tens and Hundreds .......... EW148
23.4 Keeping Track ............................. EW149
23.5 Triple Steps ................................. EW150
23.6 Estimate to Check ......................... EW151

Chapter 24: Multiplication and Division Concepts
24.1 Skip-Counting ............................... EW152
24.2 A Skip-Counting Discovery ......... EW153
24.3 Make a BIG Array ......................... EW154
24.4 How Many Vertices? ..................... EW155
24.5 Lunch Time ................................. EW156
24.6 Write Your Own ......................... EW157
24.7 Are There Any Left? ................. EW158
24.8 A Parade ................................. EW159
24.9 Division Puzzles ......................... EW160
Enrich Projects
Addition

You can show how numbers are added together by drawing pictures.

**Decide**

✓ Talk about things you can draw.
✓ How can a drawing show that things are added together?

**Do**

✓ Count how many animals are in each picture.
  Write the number. Then draw more animals.
  How many animals are there now?
✓ Write the new number.

![Add 3 more horses.](image1)

![Add 2 more whales.](image2)

![Add 1 more eagle.](image3)

![Add 4 more ants.](image4)

**Share**

✓ Draw a group of animals. Exchange pictures with another group. Draw four more animals. How many animals are there in all?
Subtraction

You can draw pictures of objects to help you subtract.

Decide

✓ Talk about objects you can draw.

✓ How can a drawing show that objects are taken away?

Do

✓ Cross out some of the fruits in each picture. Then write the subtraction sentence. Solve.

\[
\begin{align*}
\text{Bananas:} & \quad \bigcirc \bigcirc \bigcirc \bigcirc \bigcirc \\
\bigcirc \bigcirc \bigcirc \bigcirc \bigcirc & = \bigcirc \bigcirc \\
\text{Apples:} & \quad \bigcirc \bigcirc \bigcirc \bigcirc \bigcirc \\
\bigcirc \bigcirc \bigcirc \bigcirc \bigcirc & = \bigcirc \bigcirc \\
\end{align*}
\]

Share

✓ Draw from 5 to 12 toys. Trade drawings with a classmate. Cross out 3 toys. How many toys are left?
Making Groups

We make groups by counting objects. You can place the same number of objects in each group.

**Decide**

✓ Talk about how you can group objects.
✓ Talk about equal and unequal groups.

**Do**

✓ Place 6 beans on a piece of paper.
✓ Put the beans in two equal groups. Draw a picture to match.
✓ How many beans are in each group?
✓ Place the beans in three equal groups. Draw a picture to match.
✓ How many beans are in each group?
✓ Can you place 6 beans in unequal groups. Draw a picture to match.

**Share**

✓ Choose a number from 1 to 10. Draw 3 groups of buttons. Place the same number of buttons in each group. Exchange drawings with someone in your group. Make a new drawing that shows that same number of buttons in unequal groups.
Greater Numbers

Numbers have different values. These values can be shown in different ways.

**Decide**

✓ Talk about the value of a number.
✓ How can you tell if one number is greater than another number?
✓ How can you show that numbers have different values?

**Do**

✓ Write how many tens and ones.
✓ Circle the greater number of each pair.

![Number Tiles]

___ tens  ___ ten
___ ones  ___ ones

✓ Use and Workmat 3 to show each number. Circle the greater number of each pair.

43  28  |  45  18

**Share**

✓ Write five pairs of numbers on a piece of paper. Exchange lists with another group. Circle the greater number of each pair.
Making Tens

You can show numbers by making groups of ten. Count the number by ones. Each time you make ten, begin a new group.

Decide

✓ How can you show groups of ten?
✓ Talk about what happens when you complete a group of ten.

Do

✓ Color one square for each number as you count. Write the number of tens. Then write the number of ones.

19

_____ tens _____ ones

✓ On a piece of paper, write a number from 25 to 40. Exchange papers with someone in your group.

11

_____ tens _____ ones

✓ Show the number by drawing groups of ten. Write the number of tens. Then write the number of ones.

23

_____ tens _____ ones

Share

✓ Choose a number from 50 to 100. Work with your partner to show this number by drawing groups of ten.
Exploring Addition

Grouping is important in addition. When you have 10 ones, you can regroup. The 10 ones become 1 ten.

Decide

✓ When do you have to regroup in the ones column?

✓ How is regrouping used in 2-digit addition?

Do

✓ Use and Workmat 3 to solve this addition problem.

In a ball game, one team scores 56 points. The other team scores 28 points. How many points are scored in all?

✓ Write the sum.

✓ Write a story problem that uses 2-digit addition with addends that are less than 50.

✓ Draw a picture to match.

Share

✓ Exchange story problems with a classmate.

✓ Use and Workmat 3 to solve.
Exploring Subtraction

When you subtract, you take things away. You can show this by making a model, drawing a picture, or writing a number sentence.

 Decide
✓ How can you model subtraction with 📷?
✓ How can you show subtraction with a drawing?
✓ How do you write a subtraction sentence?

 Do
✓ Use 📷 to model and solve.

There are 16 books on a shelf. 9 books are taken off the shelf. How many books are left?
✓ Draw a picture to solve. Cross out the objects you subtract.

There are 12 apples on a tree. 3 apples fall off the tree. How many apples are left? 3 more apples fall off the tree. Now how many apples are left?
✓ Write a number sentence to solve.

There are 18 birds on a bench. 7 birds fly away. How many birds are left? 8 more birds fly away. Now how many birds are left?

 Share
✓ Write a subtraction story problem. Exchange with another group and solve.
2-Digit Subtraction

In 2-digit subtraction, you may need to regroup. You can use \[\text{leftrightarrow}\] to show this change. To regroup, change 1 ten into 10 ones.

**Decide**

✓ Talk about how you can use \[\text{leftrightarrow}\] to help you solve subtraction problems.

✓ When do you regroup in subtraction?

**Do**

✓ Use \[\text{leftrightarrow}\] to model and solve this 2-digit subtraction problem.

A bracelet has 76 beads. Another bracelet has 59 beads. How much longer is one bracelet than the other?

✓ Use addition to check your answer.

**Share**

✓ Write a 2-digit subtraction problem. Exchange papers with someone in your group. Use \[\text{leftrightarrow}\] to solve. Use addition to check your answer.
Picsures of the Weather

We look at weather reports to find out what the weather will be like. Some weather reports use pictures. What do the pictures show? Some pictures show a bright sun. Some pictures show a sun covered by clouds. Other pictures show snow. Show the weather using pictures.

Decide

✓ What types of weather will you show?
✓ What will you draw to stand for each type of weather?
✓ When should you use the same picture again?

Do

✓ Make a table like the one shown here.

<table>
<thead>
<tr>
<th>Monday</th>
<th>Tuesday</th>
<th>Wednesday</th>
<th>Thursday</th>
<th>Friday</th>
</tr>
</thead>
</table>

✓ Predict what the weather will be like for each day.
✓ Make a drawing that shows your prediction for each day.
✓ Make a key that shows what each picture stands for.

Share

✓ Share your weather reports with your group.
Did everyone show the same type of weather?
What pictures were used to show weather?
Possible or Impossible

The sections on a spinner will show what is possible or impossible to spin.

**Decide**

✓ What will your spinner have to show to make a spin possible or impossible? How many sections will it have?

**Do**

✓ Get patterns of spinners from your teacher. Choose a pattern or make your own. Cut it out. Use and to complete your spinner.

✓ Choose one or more of the following statements.

   - It is possible to spin an even number.
   - It is impossible to spin an even number.
   - It is possible to spin a figure with four or more sides.
   - It is impossible to spin a hexagon.

✓ Design your spinner to make the statements true.

**Share**

✓ Share your spinners. Discuss what makes each statement true. Write more true statements.

✓ Write rules for games to play using your new spinners.
Counting Patterns

When you count on by tens, fives, and ones, you are using patterns. A hundred chart can help you see these patterns.

**Decide**

✓ What happens to a number when you count on by tens? by fives? by ones?

**Do**

✓ Find the number you start with on the hundred chart. Count on by tens, fives, and ones.

✓ Complete the table.

<table>
<thead>
<tr>
<th>Start at</th>
<th>Count on by tens.</th>
<th>Count on by fives.</th>
<th>Count on by ones.</th>
<th>End at</th>
</tr>
</thead>
<tbody>
<tr>
<td>5</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>10</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>15</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>20</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>25</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Share**

✓ Discuss the patterns you see when you count on by tens, by fives, and by ones.

✓ How are these patterns like counting collections of dimes, nickels, and pennies?
Make the Same Amount

Coins have different values. A quarter has a value of 25¢. A dime has a value of 10¢. A nickel has a value of 5¢. You can mix coins to get the same amount.

**Decide**

✓ Talk about the value of different coins.
✓ How can the same amount be shown with different combinations of coins?

**Do**

✓ This table shows some ways you can make 99¢. Use coins to help you complete the table.

<table>
<thead>
<tr>
<th>Quarters</th>
<th>Dimes</th>
<th>Nickels</th>
<th>Pennies</th>
<th>Total Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>4</td>
<td>0</td>
<td>______</td>
<td>99¢</td>
</tr>
<tr>
<td>0</td>
<td>_____</td>
<td>0</td>
<td>9</td>
<td>99¢</td>
</tr>
<tr>
<td>0</td>
<td>5</td>
<td>_____</td>
<td>9</td>
<td>99¢</td>
</tr>
<tr>
<td>_____</td>
<td>6</td>
<td>2</td>
<td>4</td>
<td>99¢</td>
</tr>
</tbody>
</table>

**Share**

✓ Draw a table like the one above. Fill in 27¢ for each total value.
✓ Use coins to show 4 different ways to make 27¢.
✓ Compare your table with the others in your group. How many ways are the same as yours? How many ways are different?
Time on a Clock

There are different types of clocks. Some clocks show the time in numbers. Other clocks show the time with an hour hand and a minute hand.

**Decide**

✓ Talk about different types of clocks. How are they the same? How are they different?

✓ What types of clocks are in your classroom?

**Do**

✓ Look at each pair of clocks. One clock shows the time. The other clock is blank. Show the same time on the blank clock.

![Clocks showing different times](image)

**Share**

✓ Draw a clock that shows a time to the hour or half hour. Exchange drawings with a classmate. Now draw a different kind of clock that shows the same time.
Chapter 14

Make a Solid Figure

Look around your classroom. Which solid figures do you see? Work with your group to identify different solid figures in your classroom.

**Decide**

✓ Make a list of the solid figures you see.
✓ Which solid figures do you see a lot of? Which solid figures do you see only a few of?
✓ Can you fold a sheet of paper into the shape of a box?

**Do**

✓ Get a pattern from your teacher. Use scissors to cut out the pattern.
✓ Make a box by folding along the dotted lines.
✓ Use tape to hold the figure together.
✓ How many sides does your box have?
✓ Make a model of a different solid figure from a sheet of paper.

**Share**

✓ Compare your new solid figure with the solid figures made by other children in your group. Talk about how they are different and how they are the same.
Chapter 15

Plane Figure Mosaics

A mosaic is a design that can be made by putting figures together. In this project, you will make mosaics using plane figures.

Decide

✓ What kind of design will you make?

Do

✓ Fold a sheet of paper in half.

✓ Get pages of plane figures from your teacher. Cut them out.

✓ Glue the figures to one half of the paper to make a mosaic design. Color the figures.

✓ Count how many figures you used in all. Count the total number of sides on each figure in your mosaic.

Share

✓ Discuss and compare how many figures you and your group used. Discuss and compare the total number of sides there are in your mosaics.

✓ Exchange papers with someone in your group.

✓ Cut out that same number and type of plane figures.

✓ Glue these figures to the other half of the paper to show a different plane figure mosaic. Color the figures.
House of Cards

What is your house made of? Is it made of wood? Is it made of bricks? In this project, you will make a house of cards.

**Decide**

✓ Talk about how you might do this.

✓ Talk about how many floors you think it will have.

**Do**

✓ Work with a partner.

✓ Make a 2-card support by leaning two cards against each other. Tape the top edges together.

✓ Tape the bottom of the edge of the cards to the desk.

✓ Make another 2-card support.

✓ Place a card across the tops of the cards.

✓ Extend the row by repeating this design.

✓ Add another floor to the house. How high will you be able to make this house? Explain.

**Share**

✓ Work with your group to make other structures with cards. Discuss the patterns you use. Which design uses the most cards?
Measure with Your Shoe

A ruler is a measuring tool. It can tell you how long an object is. You can use things other than a ruler to measure. You can even use your shoe.

**Decide**

✓ How can you tell how long something is?

✓ Talk with your group about how a ruler is used.

✓ Can other objects be used as a measuring tool?

**Do**

✓ Work with a partner.

✓ Put one heel against the wall. Place the other foot in front, touching the heel to the toe.

✓ Walk heel-to-toe across the room in a straight line, while your partner counts each step.

✓ How many steps did it take to cross the room?

✓ Exchange roles.

✓ Did both of you cross the room in the same number of steps? Discuss.

**Share**

✓ Have each person draw and cut out an outline of his or her shoes. Exchange outlines with someone else. Use them to measure the distance heel-to-toe across the room. Did you cross the room in the same number of steps as before? Discuss your results.
Heavy or Light?

Suppose you pick up two bags of marbles. Without looking inside the bags, can you tell which bag has more marbles?

**Decide**

✓ What can you learn by picking up an object?

✓ Talk about tools that we use to find out if something is heavy or light.

**Do**

✓ Work with a partner.

✓ Have your partner close his or her eyes. Then place 20 marbles in a small paper bag. Place 2 marbles in another paper bag.

✓ Give both bags to your partner to hold.

✓ Without shaking the bags, ask which bag has more marbles.

✓ Exchange roles.

**Share**

✓ Put two crayons in one bag. Put 20 crayons in another bag. Close the bags. Exchange bags with another group. Ask them to choose which bag has more crayons.
Cutting in Half

Some sandwiches are big, so we cut them in half. The sandwich halves are smaller, so they are easier to hold.

**Decide**

✓ Talk about cutting something in half.
✓ What happens to an object when it is cut in half?
✓ Can you cut the halves in half again? Explain.

**Do**

✓ Work with a partner. Fold a sheet of paper in half. Open the paper. Cut along the fold line.
✓ What happens to the paper when you cut it in half? How many parts do you have now? Describe them.
✓ Fold each of the smaller parts in half. Cut each of the parts along the fold line.
✓ What happens as you cut the pieces in half? Describe the new parts.
✓ How many parts do you have in all?
✓ Can you arrange these smaller parts to form the whole piece of paper? Explain.

**Share**

✓ Cut a paper circle in half. Cut each half circle in half. Exchange these four parts with another group. Place the parts back together to look like a whole circle. Try this with other plane figures.
Counting by Tens

At a sports event or concert the seats are usually placed in sections. When you know your section, you can find your seat quickly.

**Decide**

✓ Talk about how seats are placed into sections.

✓ How can you find which seat is yours?

**Do**

✓ The drawing shows rows of 10 seats. The rows are placed into 6 sections.

✓ Use a red crayon to circle the section with 50 seats.

✓ Use a blue crayon to circle the two sections that have the same number of seats.

✓ Use a green crayon to circle the largest section of seats. How many seats are in this section?

✓ Use a yellow crayon to circle the section with 40 seats.

✓ How many seats are in all 6 sections?

**Share**

✓ Make a drawing that shows 500 seats in a theater. Place the seats in different sections. Keep 10 seats in a row. Exchange your drawing with another classmate. Count by tens and write down the number of seats in each section.
Money Amounts

Coins have different values. How would you find the total value of a collection of coins?

Decide

✓ Talk about the value of different coins.

✓ What is the best way to find the total value of a collection of coins?

Do

✓ Write the value for each group of coins.

✓ Circle two groups with the same value.

✓ Cross out the group of coins with the greatest value.

Share

✓ Work with a partner. Use play coins. Put 10 dimes, 10 nickels, and 10 pennies into a container. Each person should grab a handful of coins. Find and compare your total values.
Adding Hundreds

Different addends can have the same sum.
For example, adding 100 and 300 makes a sum of 400. Adding 200 and 200 also makes a sum of 400.

Decide

✓ Talk about different combinations of addends that when added will have the same sum.

Do

✓ Work with a partner.

✓ Write each of the following numbers on a different index card to make two sets: 100, 200, 300, 400, and 500.

✓ Complete the table with combinations of addends that make the same sum.

✓ Use your cards to help you choose combinations.

<table>
<thead>
<tr>
<th>sum</th>
<th>addend</th>
<th>addend</th>
</tr>
</thead>
<tbody>
<tr>
<td>600</td>
<td></td>
<td></td>
</tr>
<tr>
<td>700</td>
<td></td>
<td></td>
</tr>
<tr>
<td>800</td>
<td></td>
<td></td>
</tr>
<tr>
<td>900</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Share

✓ Share your tables with another group.
Discuss how many different combinations there are for each sum.
Subtracting Hundreds

Subtract 3 from 5. The difference is 2. This problem has digits in the ones place. Suppose these same digits were in the hundreds place. How can you subtract?

**Decide**

✓ Talk about how you subtract numbers.

**Do**

✓ Work with a partner. Cut a sheet of blue construction paper into four strips of equal size.

✓ Write one of the following numbers on each of the blue paper strips: 600, 700, 800, and 900.

✓ Cut a sheet of red construction paper into four strips of equal size.

✓ Write one of the following numbers on each of the red paper strips: 100, 200, 300, and 400.

✓ Close your eyes and take a blue strip and a red strip.

✓ Subtract the number on the red strip from the number on the blue strip. Write the difference.

✓ Pick three more combinations of strips. Find the difference in each pair.

**Share**

✓ Compare differences with another group.
Making Equal Groups

Objects can stand alone. You can also place them with other objects to form a group.

Decide

✓ Talk about how to place objects in groups.

Do

✓ Work with a partner.

✓ Draw three circles on a sheet of paper.

✓ Place one paper clip in each of the three circles. Fill in each row on the table that describes these three groups.

<table>
<thead>
<tr>
<th>Groups</th>
<th>Number of Groups</th>
<th>Number of Clips in Each Group</th>
<th>Total Number of Clips</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

✓ Make a new table. Use the same groups of paper clips.

✓ Add three more paper clips to each circle.

✓ Complete the table. Compare your tables.

Share

✓ Work with another group. Draw 6 circles. Compare groups of 1, 2 and 3 paper clips.
Enrich
Worksheets
Lesson 1.1

More Addition Sentences

Match the addition sentence to the picture. Fill in the missing numbers. Draw a line to show each match.

1.  
   \[ 5 + \_ = 8 \]
   \[
   \begin{array}{c}
   \includegraphics[width=0.3\textwidth]{ants1.png}
   \end{array}
   \]

2.  
   \[ \_ + 7 = 13 \]
   \[
   \begin{array}{c}
   \includegraphics[width=0.3\textwidth]{ants2.png}
   \end{array}
   \]

3.  
   \[ 4 + \_ = \_ \]
   \[
   \begin{array}{c}
   \includegraphics[width=0.3\textwidth]{ants3.png}
   \end{array}
   \]

4.  
   \[ \_ + \_ = 11 \]
   \[
   \begin{array}{c}
   \includegraphics[width=0.3\textwidth]{ants4.png}
   \end{array}
   \]

5.  
   \[ \_ + 9 = \_ \]
   \[
   \begin{array}{c}
   \includegraphics[width=0.3\textwidth]{ants5.png}
   \end{array}
   \]

WRITE Math  
Use Exercise 5. Write a story problem to show how you add to join groups.
A Maze to Count On

Count on to find the sum. Start with the greater number.

From START to FINISH, find and color a path in which all of the sums are even. You may move up, down, and across, but not diagonally.

<table>
<thead>
<tr>
<th>START</th>
<th>2 + 6 = 8</th>
<th>7 + 3 =</th>
<th>6 + 2 =</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 + 2 =</td>
<td>5 + 2 =</td>
<td>3 + 6 =</td>
<td>1 + 7 =</td>
</tr>
<tr>
<td>8 + 1 =</td>
<td>9 + 1 =</td>
<td>2 + 8 =</td>
<td>3 + 5 =</td>
</tr>
<tr>
<td>5 + 3 =</td>
<td>8 + 2 =</td>
<td>10 + 1 =</td>
<td>1 + 7 =</td>
</tr>
<tr>
<td>1 + 5 =</td>
<td>4 + 3 =</td>
<td>9 + 3 =</td>
<td>6 + 1 =</td>
</tr>
<tr>
<td>2 + 4 =</td>
<td>3 + 7 =</td>
<td>2 + 10 =</td>
<td>FINISH</td>
</tr>
</tbody>
</table>

WRITE Math Use the maze. Explain what happens when you start with an odd number and count on 1, 2, or 3.
Lesson 1.3

Name____________________________________________________

Mystery Number

Add to find each sum. Color the boxes that show doubles facts or doubles-plus-one facts to discover the mystery number. Then answer the questions below.

<p>| | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
<td>+</td>
<td>6</td>
<td>3</td>
<td>+</td>
</tr>
<tr>
<td>7</td>
<td>+</td>
<td>6</td>
<td>4</td>
<td>+</td>
</tr>
<tr>
<td>3</td>
<td>+</td>
<td>3</td>
<td>2</td>
<td>+</td>
</tr>
<tr>
<td>4</td>
<td>+</td>
<td>5</td>
<td>7</td>
<td>+</td>
</tr>
<tr>
<td>6</td>
<td>+</td>
<td>7</td>
<td>5</td>
<td>+</td>
</tr>
</tbody>
</table>

What is the mystery number? ______

What doubles fact has this number as the sum? _____ + _____ = _____

WRITE Math Is there also a doubles-plus-one fact that has this mystery number as the sum? Explain.

______________________________________________
A Teen Number Chart

Use a ten frame and the make-a-ten strategy. Write as many problems as you can to equal each teen number in the chart. Each addend must be less than 10.

<table>
<thead>
<tr>
<th></th>
<th>13</th>
<th>14</th>
<th>15</th>
<th>16</th>
<th>17</th>
<th>18</th>
</tr>
</thead>
<tbody>
<tr>
<td>7 + 6</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td>+</td>
</tr>
<tr>
<td>6 + 7</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td></td>
</tr>
<tr>
<td>+</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td>+</td>
<td></td>
<td></td>
</tr>
<tr>
<td>+</td>
<td></td>
<td>+</td>
<td>+</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
<td>+</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Stretch Your Thinking** Design a number chart for the numbers 11 and 12 like the chart above. Decide how many squares you will need in your chart. Ask a classmate to complete it.

**HINT:** Follow the pattern shown in this chart.
Clues for Sums

Each clue tells about a rule or pattern that can be used to find sums. You can use more than one clue for each addition sentence. Write the letter of the clue below each addition sentence that it tells about.

\[
\begin{array}{cccc}
8 + 9 = 17 & 9 + 9 = \boxed{18} & 8 + 7 = \boxed{15} & 0 + 6 = \boxed{6} \\
\text{C} & \boxed{18} & \boxed{15} & \boxed{6} \\
7 + 7 = \boxed{14} & 7 + 8 = \boxed{15} & 6 + 0 = \boxed{6} & 5 + 4 = \boxed{9} \\
\boxed{14} & \boxed{15} & \boxed{6} & \boxed{9}
\end{array}
\]

A. One addend is zero in this number sentence. The other addend is the same as the sum.

B. Look for a pair of number sentences where the sums are the same, the addends are the same, but the order of the addends is different.

C. To find the sum for this number sentence, find the doubles fact first and then add one.

D. Both addends are the same number.

WRITE Math: Write a clue for the fact \(4 + 7 = 11\).
Fix It

Roger completed the tables below, but he made one mistake in each table. Cross out each mistake. Write the correct number next to each cross out.

<table>
<thead>
<tr>
<th>In</th>
<th>Out</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>7</td>
</tr>
<tr>
<td>2</td>
<td>8</td>
</tr>
<tr>
<td>3</td>
<td>9</td>
</tr>
<tr>
<td>4</td>
<td>11</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>In</th>
<th>Out</th>

</thead>
<tbody>
<tr>
<td>2</td>
<td>6</td>
</tr>
<tr>
<td>4</td>
<td>7</td>
</tr>
<tr>
<td>6</td>
<td>10</td>
</tr>
<tr>
<td>8</td>
<td>12</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>In</th>
<th>Out</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>10</td>
</tr>
<tr>
<td>4</td>
<td>13</td>
</tr>
<tr>
<td>7</td>
<td>17</td>
</tr>
<tr>
<td>10</td>
<td>19</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>In</th>
<th>Out</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>11</td>
</tr>
<tr>
<td>5</td>
<td>13</td>
</tr>
<tr>
<td>6</td>
<td>16</td>
</tr>
<tr>
<td>9</td>
<td>17</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>In</th>
<th>Out</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>8</td>
</tr>
<tr>
<td>5</td>
<td>12</td>
</tr>
<tr>
<td>6</td>
<td>12</td>
</tr>
<tr>
<td>7</td>
<td>14</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>In</th>
<th>Out</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>8</td>
</tr>
<tr>
<td>5</td>
<td>10</td>
</tr>
<tr>
<td>7</td>
<td>13</td>
</tr>
<tr>
<td>9</td>
<td>14</td>
</tr>
</tbody>
</table>

WRITE Math: The rule is Add 3. Roger puts a number in and gets 8 out. What number does he put in? Explain.
**Some Sums**

Look at the numbers in each 9-square grid. The box at the end of each row is the sum of the 3 numbers in that row. The box at the end of each column is the sum of the 3 numbers in that column. Add to solve. Write the missing numbers.

1. 2 1 6 9
   5 4
   3 6 3 12
   10 13

2. 5 5 15
   3 4 8
   4 2 11
   10 13

3. 3 7
   3 7 11
   3 2 11
   12

4. 8 11
   3 5 5
   5 2
   11

**WRITE Math** What do you notice about Exercise 4?
Problems, Problems

Draw a line to connect each word problem to the number sentence that goes with it. Then find each sum to solve.

1. Sari sees 6 caterpillars. Ann sees 3 more caterpillars than Sari. How many caterpillars do the girls see in all?

2. Sari sees 6 caterpillars. Ann sees 1 fewer caterpillar than Sari. How many caterpillars do the girls see in all?

3. Sari sees 6 caterpillars. Ann sees the same number of caterpillars as Sari. How many caterpillars do the girls see in all?

4. Sari sees 6 caterpillars. Ann sees half as many caterpillars as Sari. How many caterpillars do the girls see in all?

5. Sari sees 6 caterpillars. Ann sees 5 fewer caterpillars than Sari. How many caterpillars do the girls see in all?

6. Sari sees 6 caterpillars. Ann sees 1 more caterpillar than Sari. How many caterpillars do the girls see in all?

WRITE Math Explain how drawing a picture could help when solving these problems.
What is the Difference?

Each box has four subtraction sentences.
Two go across. The other two go down.
Fill in the missing numbers so each subtraction sentence is correct.

1. \[7 - 2 = \square\]
2. \[9 - \square = 6\]
3. \[8 - 3 = \square\]
4. \[-\square = 4\]

WRITE Math
Choose a subtraction fact from Exercise 4.
Write a subtract to compare problem. Draw a picture.
Lesson 2.2

Hopping Back to 0

The frog starts at 12 on the number line.
It is hopping back to 0.
It must take 7 hops to get back to 0.
The frog can jump back 1, 2, or 3 on each hop.

Complete the subtraction sentences to show a way the frog can do this. Use the number line to help.
There is more than one way to solve.

<table>
<thead>
<tr>
<th>The frog starts at</th>
<th>It jumps back</th>
<th>It lands on</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. 12</td>
<td>3</td>
<td>9</td>
</tr>
<tr>
<td>2. 9</td>
<td>-</td>
<td>=</td>
</tr>
<tr>
<td>3. -</td>
<td>=</td>
<td>=</td>
</tr>
<tr>
<td>4. -</td>
<td>=</td>
<td>=</td>
</tr>
<tr>
<td>5. -</td>
<td>=</td>
<td>=</td>
</tr>
<tr>
<td>6. -</td>
<td>=</td>
<td>=</td>
</tr>
<tr>
<td>7. -</td>
<td>=</td>
<td>0</td>
</tr>
</tbody>
</table>

Stretch Your Thinking What if the frog started at 6 instead of 12? How would that change the problem?
Lesson 2.3

Making Fact Families

Each box has four numbers. Three of the numbers can make a fact family. Circle the numbers that belong in the fact family. Cross out the number that does not belong in the fact family. Then write the facts of the fact family.

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2, 7, 15, 8</td>
<td>7 + 8 = 15</td>
<td>___ - ___ = ___</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>3, 13, 8, 11</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>17, 8, 7, 9</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>5, 6, 9, 15</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Stretch Your Thinking** Use 5, 8, 3, and 13.

Write a fact family using three of these numbers. Then write another fact family using a different group of three of these numbers.
Which Number Goes Where?

Five children are going to run in a race. Each child wears a number on his or her shirt. The numbers are 5, 6, 7, 8, and 9. Each child has a different number.

Use the clues to decide which child wears which number. Use related addition facts to help you. Write each child’s number on his or her shirt.

1. When you subtract Andre’s number from 11, you get 4.
2. When you subtract Bill’s number from 11, you get 2.
3. When you subtract Erin’s number from 11, you get Candi’s number.
4. When you subtract Dave’s number from 17, you get Bill’s number.
5. Candi’s number is less than Erin’s number.

Stretch Your Thinking What if Clue 2 read, “When you subtract Bill’s number from 11, you get 3”? How would that change your answer?
**Lesson 2.5**

**Missing Addend Patterns**

Write the missing addends. Then look at the missing addends for each group. Describe the pattern that you see.

1. \[ \square + 6 = 12 \]
   \[ \square + 6 = 13 \]
   \[ \square + 6 = 14 \]
   \[ \square + 6 = 15 \]
   The missing addend: __________

2. \[ 8 + \square = 17 \]
   \[ 8 + \square = 15 \]
   \[ 8 + \square = 13 \]
   \[ 8 + \square = 11 \]
   The missing addend: __________

3. \[ 9 + \square = 11 \]
   \[ 9 + \square = 13 \]
   \[ 9 + \square = 15 \]
   \[ 9 + \square = 17 \]
   The missing addend: __________

4. \[ \square + 3 = 11 \]
   \[ \square + 4 = 12 \]
   \[ \square + 5 = 13 \]
   \[ \square + 6 = 14 \]
   The missing addend: __________

**Stretch Your Thinking**

Tim knows the whole and one of the parts to a problem. He wants to find the missing part. Use a pattern to write two related facts that will help Tim find the missing addend. Solve.

\[ 16, 9, \square \]

\[ \square = \____ \]
**Finish the Problem**

Write the sum or difference. Then finish writing the story problem next to each number sentence.

<table>
<thead>
<tr>
<th></th>
<th>Number Sentence</th>
<th>Story Problem</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>9 + 7 = ___</td>
<td>There are 9 children playing ball.</td>
</tr>
<tr>
<td>2.</td>
<td>15 − 8 = ___</td>
<td>There are 15 cars in the parking lot.</td>
</tr>
<tr>
<td>3.</td>
<td>10 − 5 = ___</td>
<td>Jodi has 10 shirts.</td>
</tr>
<tr>
<td>4.</td>
<td>6 + 8 = ___</td>
<td>Mark has 6 rocks.</td>
</tr>
</tbody>
</table>

**WRITE Math** Write a number sentence that uses the numbers 6, 13, and 7. Then write a story problem that goes with the number sentence.
How Many Points?

Six children played a game.
They each scored a different number of points.
Use the clues to tell which trophy belongs to which player.
Write each player’s name under his or her trophy.

1. Bill’s score is greater than 40 and less than 7 tens.
2. Ann’s score is less than 9 tens and greater than 60.
3. Deb’s score is greater than 50 and less than 8 tens.
4. Nat’s score is greater than 2 tens and less than 5 tens.
5. Julio’s score is less than 8 tens and greater than 6 tens.
6. Lily’s score is greater than 70 but less than 10 tens.

How did you find out which trophy belongs to Nat?

WRITE Math
Lesson 3.2

Get Your Pencils Here

These are the pencils in the supply cabinet at Jen’s school. There are 10 pencils in each box.

The second grade teachers each take some of the pencils. Read the clues. Write the number of pencils each teacher takes. Cross out the pencils in the picture to help.

1. Mr. Tabb takes 2 boxes of pencils and 3 other pencils.
2. Mrs. Hart takes 2 boxes of pencils.
3. Miss Moy takes 1 more pencil than Mr. Tabb.
4. Ms. Fano takes 1 more box of pencils than Mrs. Hart.
5. Mr. Erb takes the rest of the pencils.

<table>
<thead>
<tr>
<th>Mr. Tabb</th>
<th>Mrs. Hart</th>
<th>Miss Moy</th>
<th>Ms. Fano</th>
<th>Mr. Erb</th>
</tr>
</thead>
<tbody>
<tr>
<td>_______</td>
<td>_______</td>
<td>_______</td>
<td>_______</td>
<td>_______</td>
</tr>
<tr>
<td>pencils</td>
<td>pencils</td>
<td>pencils</td>
<td>pencils</td>
<td>pencils</td>
</tr>
</tbody>
</table>

WRITE Math How did you find out how many pencils Mr. Erb took?

________________________________________

________________________________________
Lesson 3.3

Least and Greatest

Use 2 of the digits in each set to make the greatest number you can. Use 2 of the digits in each set to make the least number you can. Then draw to show the numbers you made.

1. 7 9 8
   The greatest 2-digit number is
   The least 2-digit number is

2. 3 7 4
   The greatest 2-digit number is
   The least 2-digit number is

When given a set of digits to make the least 2-digit number, in which place value should you put the least digit? Explain.
Follow the Lines

Complete to show the numbers and their meanings.
Write 1, 2, 3, 4, 5, 6, 7, 8, or 9 in each △.
Write 10, 20, 30, 40, 50, 60, 70, 80, or 90 in each ◼.
Write the numbers in each □.

1. △
   
   +
   
   +
   
   30
   
   70
   
   □
   
   34
   
   74

2. ◼
   
   +
   
   +
   
   20
   
   □
   
   48

3. △
   
   +
   
   +
   
   ◼
   
   ◼
   
   91
   
   51

4. ◼
   
   +
   
   +
   
   10
   
   □
   
   86

WRITE Math
In Exercise 4, how do you know what number to write in the □?
### More Riddles

Each riddle tells about two of the numbers below it. Read the riddle. Put an \( \times \) through the number the riddle does not tell about.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.</strong></td>
<td>I have fewer than three tens. My ones digit is 2.</td>
<td><strong>2.</strong> One of my digits is 5. My other digit is 9.</td>
</tr>
<tr>
<td></td>
<td>twelve thirty-two twenty-two</td>
<td>five fifty-nine ninety-five</td>
</tr>
<tr>
<td><strong>3.</strong></td>
<td>The digit 0 is not in my ones place.</td>
<td><strong>4.</strong> My tens digit is less than my ones digit.</td>
</tr>
<tr>
<td></td>
<td>forty four fourteen</td>
<td>fifteen fifty twenty-three</td>
</tr>
<tr>
<td><strong>5.</strong></td>
<td>The digit 6 is in my ones place.</td>
<td><strong>6.</strong> My digits are the same.</td>
</tr>
<tr>
<td></td>
<td>six sixty fifty-six</td>
<td>eleven twenty-two thirteen</td>
</tr>
<tr>
<td><strong>7.</strong></td>
<td>My ones digit is greater than my tens digit.</td>
<td><strong>8.</strong> The sum of my digits is 9.</td>
</tr>
<tr>
<td></td>
<td>ten thirty-four twelve</td>
<td>thirty-six eighty eighteen</td>
</tr>
</tbody>
</table>

### Stretch Your Thinking

Write a digit riddle like the riddles on this page. Give it to a classmate to solve.
Lesson 3.6

Match the Models

Kendall modeled some numbers.

The column on the left shows the numbers she modeled.

The column on the right shows how many tens and ones she used in each model.

Find and write the missing numbers.

Then draw a line to connect each number to the number of tens and ones Kendall used to model it.

29  ●  ●  _____ tens  32  ones

94  ●  ●  1  ten  _____ ones

37  ●  ●  8  tens  _____ ones

16  ●  ●  _____ tens  3  ones

41  ●  ●  _____ ten  19  ones

73  ●  ●  2  tens  _____ ones

52  ●  ●  _____ tens  41  ones

WRITE Math

How do you know which model goes with 94?
Planning a Picnic

You are planning a picnic for 20 people. About how many of each kind of food should you bring to the picnic? Write an estimate. Explain why your estimate is reasonable.

1. I would bring about ______ sandwiches, because

______________________________________________

sandwich

2. I would bring about ______ watermelons, because

______________________________________________

watermelon

3. I would bring about ______ carrot sticks, because

______________________________________________

carrot stick

4. I would bring about ______ cookies, because

______________________________________________

cookie

Stretch Your Thinking What if your picnic was for 40 people? How many cookies would you bring then? Explain.
Color That Train

Al has a toy train with 6 cars. Each car is a different color. Use the clues to color the cars. Write the ordinal numbers.

1. The fifth car of the train is blue.
2. The yellow car is between the second car and the sixth car.
3. The red car is two positions after the second car.
4. There are three cars between the green car and the sixth car.
5. The purple car is one position before the green car.
6. The orange car is three positions after the yellow car.

The blue car is _______. The red car is _______.

The orange car is _______. The green car is _______.

The yellow car is _______. The purple car is _______.

WRITE Math Write a new clue that tells the position of the blue car.

______________________________________________________________________
Lesson 4.2

Digit Arrangements

Write two 2-digit numbers in each problem that will make the statement true. Use the digits in the box. Use each digit only once.

1. 1759
   ___ > ___

2. 0202
   ___ = ___

3. 7557
   ___ < ___

4. 2982
   ___ > ___

5. 7434
   ___ > ___

6. 2121
   ___ < ___

7. 5566
   ___ = ___

8. 1944
   ___ < ___

WRITE Math: Look at Exercise 8. Is there another answer that will make this statement true? List some of the other possible answers.
Lesson 4.3

Least to Greatest, Greatest to Least

Write one of the numbers in each blank to make these statements true. Use each number only once.

1. \[19 \quad 65 \quad 52 \quad 12 \quad 90 \quad 88\]
   \[\frac{12}{\text{least}} \quad \frac{52}{\text{greatest}} \quad \frac{90}{\text{greatest}} \quad \frac{88}{\text{least}}\]

2. \[36 \quad 38 \quad 11 \quad 39 \quad 30 \quad 13\]
   \[\frac{36}{\text{least}} \quad \frac{38}{\text{least}} \quad \frac{11}{\text{greatest}} \quad \frac{39}{\text{greatest}} \quad \frac{30}{\text{greatest}} \quad \frac{13}{\text{least}}\]

3. \[52 \quad 72 \quad 92 \quad 22 \quad 42 \quad 65\]
   \[\frac{52}{\text{least}} \quad \frac{72}{\text{least}} \quad \frac{92}{\text{greatest}} \quad \frac{22}{\text{greatest}} \quad \frac{42}{\text{greatest}} \quad \frac{65}{\text{least}}\]

4. \[18 \quad 81 \quad 47 \quad 74 \quad 76 \quad 67\]
   \[\frac{18}{\text{least}} \quad \frac{81}{\text{least}} \quad \frac{47}{\text{greatest}} \quad \frac{74}{\text{greatest}} \quad \frac{76}{\text{greatest}} \quad \frac{67}{\text{least}}\]

5. \[43 \quad 16 \quad 52 \quad 54 \quad 49 \quad 80\]
   \[\frac{43}{\text{least}} \quad \frac{16}{\text{least}} \quad \frac{52}{\text{greatest}} \quad \frac{54}{\text{greatest}} \quad \frac{49}{\text{greatest}} \quad \frac{80}{\text{least}}\]

Stretch Your Thinking Look at Exercise 5. Where can you write the number 80? Explain.
Lesson 4.4

Be a Basketball Detective

Five children are on a basketball team. Use the clues to find the children’s shirt numbers. Write each child’s shirt number below.

1. Tim’s number rounds to 90. Both of its digits are the same.

2. Lee’s number rounds to 30. Its tens digit is 1 more than its ones digit.

3. Taya’s number rounds to 70. Its tens digit is 1 less than its ones digit.

4. Cole’s number rounds to 50. It has more than 8 ones.

5. Alice’s number rounds to 30. If you add 2 to it, it will round to 40.

Tim
Lee
Taya
Cole
Alice

WRITE Math Write a clue for a 2-digit number. Tell which ten it rounds to as part of the clue.
Lesson 4.5

Even Sums, Odd Sums

Find the sums. Write **even** or **odd**.

Look for patterns.

More About Skip-Counting

Ken is skip-counting by different numbers. He starts counting at 0. Read the clues. Circle the number he could be counting by.

1. Ken shades 20, 25, and 30 on the hundred chart. He is counting by: __________.
   twos  fives  tens

2. Ken shades 76, 78, and 80 on the hundred chart. He could be counting by: __________.
   twos  fours  tens

3. Ken shades 15, 18, and 21 on the hundred chart. He could be counting by: __________.
   twos  threes  fours

4. Ken shades 24 and 28 on the hundred chart. He could be counting by: __________.
   threes  fours  fives

5. Ken shades 50 on the hundred chart. He could be counting by: __________.
   twos  threes  fours

6. Ken shades 65 on the hundred chart. He could be counting by: __________.
   threes  fours  fives

WRITE Math How did you solve Exercise 6?
Patterns and Problems

Find which table goes with each of the stories.
Complete each table. Then find the pattern to solve.

<table>
<thead>
<tr>
<th>There are 7 cows. Each cow has 4 spots.</th>
<th>There are 7 fish. Each fish has 2 eyes.</th>
<th>There are 7 tigers. Each tiger has 10 stripes.</th>
</tr>
</thead>
</table>

1. How many ____________ are on 7 ____________?

<table>
<thead>
<tr>
<th>number of ____________</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>number of ____________</td>
<td></td>
<td>30</td>
<td>40</td>
<td>50</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

There are ________________ on 7 ________________.

2. How many ____________ are on 7 ____________?

<table>
<thead>
<tr>
<th>number of ____________</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>number of ____________</td>
<td></td>
<td>12</td>
<td>16</td>
<td>20</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

There are ________________ on 7 ________________.

3. How many ____________ are on 7 ____________?

<table>
<thead>
<tr>
<th>number of ____________</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>number of ____________</td>
<td></td>
<td>6</td>
<td>8</td>
<td>10</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

There are ________________ on 7 ________________.

**Stretch Your Thinking** Look at the table in Exercise 2.
How did you find the story to match?

Lesson 4.8

Two Number Patterns

Read the clues to solve.
Use a hundred chart to help you.
1. Jack Tina
   I am skip-counting by fives. I start my pattern with 16.
   I am skip-counting by twos. I start my pattern with 13.

Write a number that is in both Jack’s and Tina’s patterns. _______________________

2. Pam Matt
   I am skip-counting by tens. I start my pattern with 29.
   I am skip-counting by twos. I start my pattern with 81.

Write a number that is in both Pam’s and Matt’s patterns. _______________________

3. Sean Zoe
   I am skip-counting by fives. I start my pattern with 18.
   I am skip-counting by tens. I start my pattern with 63.

Write a number that is in both Sean’s and Zoe’s patterns. _______________________

Stretch Your Thinking If they count up to 100, are there any numbers that will be in all six of the children’s patterns? Explain. _______________________

EW29 Enrich © Harcourt • Grade 2
**What Number Am I?**

Read the clues. Write the number.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1. I am 3 more tens than 17. What number am I?</td>
<td>2. I am 40 more than 25. What number am I?</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>3. I am 6 more tens than 12. What number am I?</td>
<td>4. I am 2 more tens than 64. What number am I?</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>5. I am 20 more than 34. What number am I?</td>
<td>6. I am 8 more tens than 11. What number am I?</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>7. I am 4 more tens than 30. What number am I?</td>
<td>8. I am 2 more tens than 68. What number am I?</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>9. I am 50 more than 23. What number am I?</td>
<td>10. I am 3 more tens than 54. What number am I?</td>
</tr>
</tbody>
</table>

**Stretch Your Thinking**

Think of a number. Write a clue that can be used to find that number.
Name

Lesson 5.2

Story Problem Fun

Complete the problems. Write numbers in the blanks. Use a 1-digit number and a 2-digit number in each problem. Use Workmat 11 and _______ to solve.

1. Ian has ______ toy cars. Lucas has ____ more toy cars than Ian. How many toy cars does Lucas have?

   toy car  ______ toy cars

2. Emmy has ______ blue markers and ____ green markers. How many markers does Emmy have in all?

   marker ______ markers

3. Sara has ______ blocks. Marta has ____ more blocks than Sara. How many blocks does Marta have?

   block _______ blocks

4. Tom has ______ pennies. Maria gives him ____ more pennies. How many pennies does Tom have now?

   penny _______ pennies

Stretch Your Thinking Write a problem like the ones above. Ask a classmate to write numbers in it and solve.
Write the Addition Problem

The workmats show the sums for addition problems. Write an addition problem for each workmat.

1. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Add 37 and 33.

2. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>7</td>
</tr>
</tbody>
</table>

Add ___ and ___.

3. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>9</td>
</tr>
</tbody>
</table>

Add ___ and ___.

4. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
</tr>
</tbody>
</table>

Add ___ and ___.

5. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>5</td>
</tr>
</tbody>
</table>

Add ___ and ___.

6. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>6</td>
</tr>
</tbody>
</table>

Add ___ and ___.

7. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>9</td>
</tr>
</tbody>
</table>

Add ___ and ___.

8. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>7</td>
</tr>
</tbody>
</table>

Add ___ and ___.

9. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Add ___ and ___.

Stretch Your Thinking Write another addition problem for the Workmat in Exercise 9.

___ and ___
What is the Problem?

The models below can be used to solve problems. Write a problem for each model. Use Workmat 11 and to solve the problem.

1. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>8</td>
</tr>
</tbody>
</table>

Joan sees 48 bees. Dan sees 33 bees. How many bees do they see in all?

81 bees

2. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>3</td>
</tr>
</tbody>
</table>

3. Workmat

<table>
<thead>
<tr>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>8</td>
<td>1</td>
</tr>
</tbody>
</table>

Stretch Your Thinking Write a story problem. Have a classmate draw the tens and ones to solve.
Find the Errors

Find the errors in the addition problems. Circle them. Then show how to do the problem correctly. Use Workmat 3 and if you need to.

<table>
<thead>
<tr>
<th></th>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>4</td>
<td>9</td>
</tr>
<tr>
<td></td>
<td>5</td>
<td>1</td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2.</td>
<td>1</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>4</td>
<td>9</td>
</tr>
<tr>
<td></td>
<td>6</td>
<td>1</td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.</td>
<td>2</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>3</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>9</td>
<td>1</td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.</td>
<td>1</td>
<td>7</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>8</td>
</tr>
<tr>
<td></td>
<td>1</td>
<td>8</td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
</tr>
<tr>
<td>5.</td>
<td>1</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>6</td>
<td>9</td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
</tr>
<tr>
<td>6.</td>
<td>1</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>9</td>
<td>2</td>
</tr>
<tr>
<td>+</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

What error did you find in Exercise 5?
Arrange the Digits

Arrange the digits in the empty boxes to make the addition problem true. Use Workmat 3 and if you need to.

1. 

2. 

3. 

4. 

5. 

6. 

Is there another way you could have arranged the digits in Exercise 6? Explain.
How Does It Add Up?

Use the three numbers to write an addition problem. Then write a story problem that can be solved by the addition problem.

1. $35 + 17 + 18 = 60$
   - **Ann has 17 stickers.**

2. $38 + 62 + 24 = 124$
   - **How did you decide where the numbers should go in each addition problem?**

3. $43 + 27 + 16 = 86$

**WRITE Math**

How did you decide where the numbers should go in each addition problem?
The Lost Digits

These addition problems are missing some digits. Can you put them back where they belong? Write the correct digit in each of the boxes. Use each digit in the cloud only once.

Stretch Your Thinking Write your own addition problem with a missing digit. Then have a classmate find the missing digit.
Lesson 6.3

How Many Could There Be?

There are 40 children on Meg’s street. There are more boys than girls. The number of both boys and girls is greater than 9. Write some of the possible 2-digit addition problems that show how many boys and girls there could be. Use an addend only once.

```
  30
+ 10
---
  40
```

```
  10
+ 20
---
  30
```

```
  20
+ 20
---
  40
```

**WRITE Math**  Explain why $20 + 20 = 40$ is not used.

______________________________

______________________________
Lesson 6.4

Estimation Challenge

Solve these problems without using a number line. Round each addend to the nearest ten. Find the estimated sum.

1. Kirk scores 16 points in the first half of the basketball game. He scores 13 points in the second half. About how many points does he score in all?

   about _______ points  basketball

   16 → + 13 → +

2. Sadie makes 17 pitches at the beginning of softball practice. She also makes 22 pitches at the end of practice. About how many pitches does she make in all?

   about _______ pitches  softball

   17 → + 22 → +

3. There are 23 children on Andrew’s swim team. There are 36 children on Leah’s swim team. About how many children are there on both swim teams together?

   about _______ children  swimming pool

   23 → + 36 → +

Stretch Your Thinking  Write your own problem in which you estimate to solve.

__________________________________________

__________________________________________
Mystery Addends

Use the clues and the given sum to help you find the addends. Complete the addition problem.

1. The first addend is 2 more than 15. The second addend is 2 more than the first addend.
   \[
   \begin{array}{c}
   17 \\
   + 19 \\
   \hline
   36
   \end{array} \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad \quad
   \end{array}
\]

2. The first addend is 5 more than 30. The second addend is 10 less than the first addend.
   \[
   \begin{array}{c}
   + \\
   \hline
   60
   \end{array}
\]

3. The first addend is 4 more than 30.
   \[
   \begin{array}{c}
   \hline
   71
   \end{array}
\]

4. The first addend is 5 more than 20.
   \[
   \begin{array}{c}
   + \\
   \hline
   42
   \end{array}
\]

5. The first addend is 5 more than the second addend.
   \[
   \begin{array}{c}
   + \quad 25
   \hline
   \end{array}
\]

6. The two addends are the same.
   \[
   \begin{array}{c}
   + \quad 48
   \hline
   \end{array}
\]

WRITE Math
How did you solve Exercise 6?
Lesson 6.6

Missing Points

Complete the table by solving the problems below.

<table>
<thead>
<tr>
<th>Points Scored in Soccer Game</th>
</tr>
</thead>
<tbody>
<tr>
<td>Player</td>
</tr>
<tr>
<td>Anton</td>
</tr>
<tr>
<td>Liza</td>
</tr>
<tr>
<td>Sasha</td>
</tr>
<tr>
<td>Milo</td>
</tr>
</tbody>
</table>

1. Liza scored 17 more points than Milo.
   How many points did Liza score?
   _______ points

2. Sasha and Liza scored a total of 94 points.
   How many points did Sasha score?
   _______ points

3. Who scored the most points in the soccer game? 
   ____________________________

WRITE Math Explain how you solved Exercise 3.
   ____________________________________________________________
Which Toys?
Look at the prices of the toys.
Complete the addition problems.

1. Jason buys two toys for exactly 76¢. One of the toys is a top. What other toy does Jason buy?

\[
37¢ \quad 28¢ \quad 45¢ \quad 56¢ \quad 39¢
\]

\[
\text{top} \quad \text{car} \quad \text{beach ball} \quad \text{whistle} \quad \text{frog}
\]

\[
\_ + \_ + \_ + \_ = \_
\]

2. Henry buys two toys for exactly 84¢. Which two toys might he buy?

\[
\_ + \_ = \_
\]

\[
\_ + \_ + \_ + \_ = \_
\]

and \\

\[\text{Stretch Your Thinking} \quad \text{Is there another answer for Exercise 2? Explain.}\]
Lesson 7.1

How Many Tens?

How many tens should be subtracted to make each tens sentence true?

Write the number of tens.

1. $32 - \underline{2}$ tens = 12
2. $49 - \underline{\phantom{2}}$ tens = 19

3. $58 - \underline{\phantom{2}}$ tens = 28
4. $87 - \underline{\phantom{2}}$ tens = 37

5. $92 - \underline{\phantom{2}}$ tens = 72
6. $55 - \underline{\phantom{2}}$ tens = 15

7. $43 - \underline{\phantom{2}}$ tens = 23
8. $82 - \underline{\phantom{2}}$ tens = 52

9. $98 - \underline{\phantom{2}}$ tens = 28
10. $59 - \underline{\phantom{2}}$ tens = 39

11. $78 - \underline{\phantom{2}}$ tens = 48
12. $63 - \underline{\phantom{2}}$ tens = 23

13. $91 - \underline{\phantom{2}}$ tens = 11
14. $75 - \underline{\phantom{2}}$ tens = 45

15. $64 - \underline{\phantom{2}}$ tens = 44
16. $33 - \underline{\phantom{2}}$ tens = 13

Stretch Your Thinking

Choose a number from 1 to 5. Write a number sentence in which that number of tens is subtracted from another number.
Lesson 7.2

Subtract to Match

Match each number sentence to the number that it is missing. Use Workmat 11 and ⬤ if you need to.

1. $36 - ? = 28$  ●  ○ 2
2. $? - 7 = 35$  ●  ○ 55
3. $51 - ? = 47$  ●  ○ 8
4. $62 - ? = 59$  ●  ○ 35
5. $? - 9 = 46$  ●  ○ 4
6. $24 - ? = 19$  ●  ○ 24
7. $? - 6 = 29$  ●  ○ 3
8. $81 - ? = 79$  ●  ○ 42
9. $? - 9 = 15$  ●  ○ 5

WRITE Math  How did you solve Exercise 9?
Lesson 7.3

Match the Mats

Look at the numbers in the center. Each number has been subtracted from one of the numbers shown above it. One of the workmats below it shows the difference. Color to match the parts of the subtraction sentence the same color.

Stretch Your Thinking  Could you have used addition to match the numbers to the Workmats? Explain.
Follow the Clues

Read the clues. Use Workmat 11 and . Write how many.

1. Sara paints 4 more than 10 postcards.
   She gives away 4 less than 10 of her postcards.
   How many postcards does she have left?
   ______ postcards

2. Keith makes 3 more than 20 puppets.
   He gives 6 less than 20 of them to his sister.
   How many puppets does he have left?
   ______ puppets

3. Ross fingerpaints 8 more than 20 pictures.
   He gives away 3 less than 20 of his pictures.
   How many pictures does he have left?
   ______ pictures

Stretch Your Thinking  Read the problem. Write clues to replace the numbers. Then solve the problem.

Troy has 26 markers. 17 markers are blue. The rest of the markers are red. How many of the markers are red?

____________________

____________________

____________________
Lesson 7.5

Balancing Amounts

Each balance is missing a number. Find the number that will make the balance level. Write the number in the box. Use each number only once.

1. 15 - 9 = 
2. 33 -  = 28
3. 22 -  = 19
4. 31 -  = 27
5. 53 -  = 46
6. 29 - 21 = 

WRITE Math How did you find out which number belongs on the balance in Exercise 4?
Subtraction Wheels

Brett gives each wheel one spin. He finds that the difference between the numbers is 15. Which two numbers does Brett spin?

\[ \text{_________ and _________} \]

Brett spins the wheels again. Both wheels stop on different numbers, but Brett still finds that the difference is 15. Which two numbers does Brett spin this time?

\[ \text{_________ and _________} \]

**Stretch Your Thinking** How many more ways could Brett spin two numbers with a difference of 15? List all the different ways.

\[ \text{___________________________} \]

\[ \text{___________________________} \]
Lesson 8.1

Fill in the Blanks

Write 2-digit numbers in the blanks. Solve.

1. Lucy has ___37___ marbles. She puts ___18___ marbles in a bag. How many marbles are not in the bag?
   
   marble  ___19___ marbles

2. Toby has ______ blocks. He puts ______ blocks on a shelf and the rest in a box. How many blocks does he put in the box?
   
   block

3. Eric puts ______ model airplanes on a shelf. He has ______ model airplanes in all. How many are not on the shelf?
   
   model airplane

4. Alice has ______ beads. She uses some to make a bracelet. She has ______ beads left. How many beads does she use to make the bracelet?
   
   bead  ______ beads

WRITE Math Write a problem that you can subtract to solve.
Two-Step Problems

Subtract to solve each problem. Regroup if you need to.

1. Mike has 42 toy trucks. Suzy has 3 more toy trucks than Mike. Juan has 29 fewer toy trucks than Suzy. How many toy trucks does Juan have?

   
   _______ toy trucks

2. Jamal has 82 trading cards. Laura has 8 more trading cards than Jamal. Henry has 35 fewer trading cards than Laura. How many trading cards does Henry have?

   
   _______ trading cards

3. Jen has 32 building blocks. Sue has 7 more building blocks than Jen. Maria has 16 fewer building blocks than Sue. How many building blocks does Maria have?

   
   _______ building blocks

WRITE Math How did you find the number to subtract from to solve Exercise 2?
Jumbled Numbers

Rewrite the numbers below to make subtraction problems with regrouping. Use each number only once. Then solve.

| 63 | 27 | 18 | 9 | 54 | 72 | 81 | 36 | 90 |

How did you check if you had to regroup to solve the problems?

________________________________________________________________________

WRITE Math

________________________________________________________________________

________________________________________________________________________
Lesson 8.4

The Same Difference

Write and solve two subtraction problems that show how many of each there might be. Then write the numbers.

1. There are four different kinds of fruit at the store. There is a different number of each kind of fruit. There are 28 more bananas than pears. There are 28 more apples than oranges. There are more pears than apples.

   _______ bananas  
   _______ pears  
   _______ apples  
   _______ oranges

2. There are four different kinds of animals on the farm. There is a different number of each kind of animal. There are 19 more cows than sheep. There are 19 more ducks than hens. There are more hens than cows.

   _______ cows  
   _______ sheep  
   _______ ducks  
   _______ hens

How did you find the numbers in Exercise 2?
Add to Subtract

Julie solved some subtraction problems. Then she used addition to check her answers. Now solve each addition problem. Write the subtraction problem to check your answers. Then subtract.

<table>
<thead>
<tr>
<th>Addition</th>
<th>Subtraction</th>
<th>Addition</th>
<th>Subtraction</th>
</tr>
</thead>
<tbody>
<tr>
<td>18 + 16</td>
<td>34</td>
<td>24 + 4</td>
<td>28</td>
</tr>
<tr>
<td>34</td>
<td>16</td>
<td>18</td>
<td></td>
</tr>
</tbody>
</table>

2. 13 + 48

3. 38 + 35

4. 29 + 17

5. 28 + 57

6. 54 + 27

7. 64 + 28

8. 79 + 19

**WRITE Math**

Look at the last addition problem.

Is there more than one subtraction problem that can be used to check?

__________________________
Lesson 8.6

Find the Mistake

Circle the mistake in each problem.
Write the correct numbers. Find the correct estimate.

1. 88 → 90 → 80
   - 72 → 70
   √ 20 → 10

2. 67 → 70
   - 52 → 60
   √ 10

3. 78 → 80
   - 56 → 50
   √ 30

4. 69 → 70
   - 58 → 50
   √ 20

5. 86 → 80
   - 51 → 50
   √ 30

6. 73 → 80
   - 41 → 40
   √ 40

7. 63 → 70
   - 57 → 60
   √ 10

8. 76 → 70
   - 54 → 50
   √ 20

9. 68 → 70
   - 56 → 50
   √ 20

WRITE Math: How did the rounding mistakes change the estimates?
**Lesson 8.7**

**Use the Method**

Write a problem that is best solved by each method. Then use the methods to solve the problems.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Use mental math.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>2. Use paper and pencil.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>3. Use a calculator.</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**WRITE Math** How did you choose the numbers you wrote in the mental math problem?

__________________________
**Where to Start?**

Tracy used mental math to solve some subtraction problems. Find the numbers Tracy started with. Write the subtraction sentences she solved. Then find the differences.

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>+ 4 = 57</td>
<td></td>
<td>So,</td>
</tr>
<tr>
<td></td>
<td><strong>-</strong> 20</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>+ 4 = 20</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2.</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>+ 5 = 61</td>
<td></td>
<td>So,</td>
</tr>
<tr>
<td></td>
<td><strong>-</strong> 40</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>+ 5 = 40</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>3.</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>+ 7 = 83</td>
<td></td>
<td>So,</td>

<tr>
<td></td>
<td>+ 7 = 50</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>4.</strong></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>+ 9 = 76</td>
<td></td>
<td>So,</td>
</tr>
<tr>
<td></td>
<td><strong>-</strong> 30</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>+ 9 = 30</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**WRITE Math**

Look at Exercise 4. How did you find the numbers that Tracy started with?
Lesson 8.9

A Pair of Problems

Find the sum or difference for part A in each problem. Then use the answer to solve part B.

A. Kim has 35 beads. She gives 18 beads to Callie. How many beads does Kim have now?

<table>
<thead>
<tr>
<th>A. Kim has 35 beads. She gives</th>
<th>B. Callie gives 9 beads back to</th>
</tr>
</thead>
<tbody>
<tr>
<td>18 beads to Callie. How many</td>
<td>Kim. How many beads does Kim</td>
</tr>
<tr>
<td>beads does Kim have now?</td>
<td>have now?</td>
</tr>
<tr>
<td>☺ bead</td>
<td>______ beads</td>
</tr>
<tr>
<td></td>
<td>______ beads</td>
</tr>
</tbody>
</table>

A. Jon and Eli each have 32 pennies. How many pennies do they have in all?

<table>
<thead>
<tr>
<th>A. Jon and Eli each have</th>
<th>B. Jon and Eli give 15 of their</th>
</tr>
</thead>
<tbody>
<tr>
<td>32 pennies. How many</td>
<td>combined pennies to Tim.</td>
</tr>
<tr>
<td>pennies do they have in</td>
<td>How many pennies do Jon</td>
</tr>
<tr>
<td>all?</td>
<td>and Eli have now?</td>
</tr>
<tr>
<td>☺ penny</td>
<td>______ pennies</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A. Kate has 43 blocks. Alex has 18 blocks. Kate gives 8 blocks to Alex. How many blocks do they each have now?

<table>
<thead>
<tr>
<th>A. Kate has 43 blocks. Alex</th>
<th>B. How many more blocks does</th>
</tr>
</thead>
<tbody>
<tr>
<td>has 18 blocks. Kate gives</td>
<td>Kate have than Alex?</td>
</tr>
<tr>
<td>8 blocks to Alex. How many</td>
<td></td>
</tr>
<tr>
<td>blocks do they each have</td>
<td></td>
</tr>
<tr>
<td>now?</td>
<td></td>
</tr>
<tr>
<td>☺ block</td>
<td>Kate: ______ blocks</td>
</tr>
<tr>
<td></td>
<td>Alex: ______ blocks</td>
</tr>
<tr>
<td></td>
<td>______ more blocks</td>
</tr>
</tbody>
</table>

Stretch Your Thinking Write a problem with a part A and a part B. Trade your problem with a classmate and solve.

________________________________________________________________________

________________________________________________________________________
Missing Survey Data

Eric took 3 surveys of his classmates. He forgot to record their answers! Use the clues to help Eric fill in his tally tables.

1. Clues:
- Eric surveyed 12 classmates.
- The most classmates chose chocolate.
- One more classmate chose strawberry than vanilla.

<table>
<thead>
<tr>
<th>Favorite Ice Cream</th>
<th>Flavor</th>
<th>Tally</th>
</tr>
</thead>
<tbody>
<tr>
<td>chocolate</td>
<td></td>
<td></td>
</tr>
<tr>
<td>vanilla</td>
<td></td>
<td></td>
</tr>
<tr>
<td>strawberry</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. Clues:
- Eric surveyed 22 classmates.
- The fewest classmates chose baseball.
- The same number of classmates chose soccer and swimming.

<table>
<thead>
<tr>
<th>Favorite Sport</th>
<th>Sport</th>
<th>Tally</th>
</tr>
</thead>
<tbody>
<tr>
<td>soccer</td>
<td></td>
<td></td>
</tr>
<tr>
<td>baseball</td>
<td></td>
<td></td>
</tr>
<tr>
<td>swimming</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3. Clues:
- The most classmates chose dinner.
- Seven classmates chose breakfast.
- Eric surveyed 32 classmates.

<table>
<thead>
<tr>
<th>Favorite Meal</th>
<th>Meal</th>
<th>Tally</th>
</tr>
</thead>
<tbody>
<tr>
<td>breakfast</td>
<td></td>
<td></td>
</tr>
<tr>
<td>lunch</td>
<td></td>
<td></td>
</tr>
<tr>
<td>dinner</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

WRITE Math Look at Exercise 3. How did you decide how many tally marks to put in each row?
Sunflower Growth

Mae grows a sunflower. She draws and records the height on Days 1 and 4. Draw how the sunflower may have looked on Days 2 and 3. Record the heights.

<table>
<thead>
<tr>
<th>Day</th>
<th>Height</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2 cm</td>
</tr>
<tr>
<td>2</td>
<td>_____ cm</td>
</tr>
<tr>
<td>3</td>
<td>_____ cm</td>
</tr>
<tr>
<td>4</td>
<td>8 cm</td>
</tr>
</tbody>
</table>

Stretch Your Thinking Between which two days did the sunflower grow the most?

between Day _______ and Day _______
Summer Bar Graph

Annabelle tells about her summer using a bar graph. She shows the number of days she spent doing each activity, but forgets to write the activities! Help Annabelle complete her bar graph.

1. Annabelle spent the least amount of time babysitting.
2. Annabelle did not take an art class.
3. Annabelle spent 2 fewer days at camp than she did volunteering.
4. Annabelle went to the beach with her family.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Number of Days</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>0 1 2 3 4 5 6 7 8 9 10</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Which clue was the least helpful? Explain.

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
Lesson 9.4

Grocery Basket Graphs

Henry goes grocery shopping.
He buys four different kinds of items.
He buys a different number of each item.
Draw how many of each item Henry buys.
Then fill in the bar graph to show what he buys.

Hendy’s Groceries

<table>
<thead>
<tr>
<th>Number of Items</th>
<th>0</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grocery Items</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Stretch Your Thinking How many items does Henry buy altogether at the grocery store?

______________________________ items
**Lesson 9.5**

**Missing Keys**
Kelly takes 3 surveys.
She forgets to fill in the key!
Help Kelly complete her pictographs by filling in the key.

1. **Number of Books Read**

<table>
<thead>
<tr>
<th>Name</th>
<th>Tally</th>
</tr>
</thead>
<tbody>
<tr>
<td>Greg</td>
<td>![Tally Marks]</td>
</tr>
<tr>
<td>Drew</td>
<td>![Tally Marks]</td>
</tr>
<tr>
<td>Liz</td>
<td>![Tally Marks]</td>
</tr>
</tbody>
</table>

Key: Each 📚 stands for _____ books.

2. **Number of Snowy Days This Winter**

<table>
<thead>
<tr>
<th>Month</th>
<th>Tally</th>
</tr>
</thead>
<tbody>
<tr>
<td>December</td>
<td>![Tally Marks]</td>
</tr>
<tr>
<td>January</td>
<td>![Tally Marks]</td>
</tr>
<tr>
<td>February</td>
<td>![Tally Marks]</td>
</tr>
</tbody>
</table>

Key: Each 🧊 stands for _____ days.

3. **Favorite Dog**

<table>
<thead>
<tr>
<th>Dog</th>
<th>Tally</th>
</tr>
</thead>
<tbody>
<tr>
<td>bulldog</td>
<td>![Tally Marks]</td>
</tr>
<tr>
<td>poodle</td>
<td>![Tally Marks]</td>
</tr>
<tr>
<td>collie</td>
<td>![Tally Marks]</td>
</tr>
</tbody>
</table>

Key: Each 🐶 stands for _____ votes.

**Stretch Your Thinking**
Which pictograph shows the greatest number of tally marks received? How do you know?
**Make a Line Plot**

Max’s class made a table to record the number of pockets they had in their clothing. Make a line plot to show their data. Then circle the mode of the data.

<table>
<thead>
<tr>
<th>Number of Pockets in Our Clothing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of Pockets</td>
</tr>
<tr>
<td>one</td>
</tr>
<tr>
<td>two</td>
</tr>
<tr>
<td>four</td>
</tr>
<tr>
<td>five</td>
</tr>
<tr>
<td>seven</td>
</tr>
<tr>
<td>eight</td>
</tr>
</tbody>
</table>

**Stretch Your Thinking** What is the range of the data? Explain.
Make a Town

Think of 3 places at your school. Name them and mark them on the grid below. Describe how to get to each place.

Stretch Your Thinking Choose two places on your grid and tell how to get from one place to the other.

1. Start at 0. Go right ______. Go up ______.
   You are at the ________________________________.

2. Start at 0. Go right ______. Go up ______.
   You are at the ________________________________.

3. Start at 0. Go right ______. Go up ______.
   You are at the ________________________________.

1. Start at 0. Go right ______. Go up ______.
   You are at the ________________________________.

2. Start at 0. Go right ______. Go up ______.
   You are at the ________________________________.

3. Start at 0. Go right ______. Go up ______.
   You are at the ________________________________.

EW64

Name ____________________________________________

Lesson 10.1

Color the Spinners

Read the clues below.
Decide which spinner each clue tells about.
Color that spinner to match.

1. This spinner has more than 3 sections and green is an impossible outcome.

2. This spinner has more than 4 sections and green is a certain outcome.

3. The outcomes for this spinner are yellow, blue, red, and orange.

4. This spinner has fewer than 3 sections and blue is a certain outcome.

5. This spinner has 2 sections and blue is an impossible outcome.

6. This spinner has 3 sections and red is a certain outcome.

7. The outcomes for this spinner are yellow and green.

Stretch Your Thinking Is spinning A on the spinner certain, impossible, or neither? Explain.

__________________________________________

__________________________________________

__________________________________________
Color the Cubes

Draw cubes in each bag to match the statement. Use 2 different colors. Then write another true statement about the cubes in the bag.

1. It is more likely that a red cube will be pulled.

2. It is less likely that a yellow cube will be pulled.

3. It is more likely that a green cube will be pulled.

4. It is less likely that a blue cube will be pulled.

Stretch Your Thinking Look at the cubes you drew in Exercise 4. How many more blue cubes do you need to add to the bag to make the statement false? Explain.
Name__________________________

Lesson 10.3

**Missing Spins**

1. Jack and Mark each spin the pointer 10 times. Jack spins F 5 times and H 2 times. Mark spins F 3 times and H 6 times. Does Jack or Mark spin G more often?

2. Sam and Alex each spin the pointer 12 times. Sam spins Q 5 times and S 3 times. Alex spins Q 4 times and S 5 times. Does Sam or Alex spin R more often?

3. Liz and Ann each spin the pointer 15 times. Liz spins J 4 times and M 5 times. Ann spins J 1 time and M 6 times. They each spin K and L an equal number of times. Does Liz or Ann spin K more often?

**Explain how you solved Exercise 3.**
Creative Spinners

Read the clues that tell about each spinner. Then complete the spinner to match.

1. The outcomes for this spinner are equally likely.
   
   ![Spinner Diagram](image1)

2. The outcomes for this spinner are not equally likely.
   
   ![Spinner Diagram](image2)

3. The outcomes for this spinner are equally likely.
   
   ![Spinner Diagram](image3)

4. The outcomes for this spinner are not equally likely.
   
   ![Spinner Diagram](image4)

**Stretch Your Thinking** Look at the spinner in Exercise 3. Will the outcomes always be equally likely when a spinner is divided into two equal sections? Explain why or why not.
Predictions

Complete the graph or table to match the prediction.

1. Jacob predicts he is less likely to pull a quarter from the bag.

   **Coins in a Bag**
   
<table>
<thead>
<tr>
<th>Coin</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. Kaitlin predicts she is more likely to pull a yellow tile from the bag.

   **Tiles in a Bag**
   
<table>
<thead>
<tr>
<th>Key: Each stands for 2 tiles.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

3. Ben predicts he is equally likely to pull a red cube or a blue cube from the bag.

   **Cubes in a Bag**
   
<table>
<thead>
<tr>
<th>Color</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

   **Number of Cubes**
   
<table>
<thead>
<tr>
<th>0</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
<th>10</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Stretch Your Thinking** Create your own number table. Write a prediction to go with your table. Ask a friend to test your prediction.
Bunches of Flowers

Draw a different bunch of flowers in each vase. Use coins. Find the total value for each bunch.

1. daisies 1¢ each
   total value: __________

2. tulips 5¢ each
   total value: __________

3. roses 10¢ each
   total value: __________

4. total value: __________

Which bunch of flowers costs the most? How do you know?
What is the Missing Coin?

Draw and label the coins given. Then draw the missing coin to find the total value.

1. Jim has 2 quarters, 2 pennies, and another coin. He has 77¢ in all. What is the other coin?

   ![Missing coin](image1)

   25¢  25¢  1¢  1¢  missing coin

2. Tasha has 3 dimes, 1 nickel, and another coin. She has 45¢ altogether. What is the other coin?

   ![Missing coin](image2)

3. Carl has 1 half dollar, 1 penny, 2 dimes, and another coin. He has 76¢ in all. What is the other coin?

   ![Missing coin](image3)

How did you find the missing coin in Exercise 3?
Lesson 11.3

Groups of Coins

Find the total value for each group of coins.

1. Gina

![Image of coins]

2. Ralph

![Image of coins]

3. Leah

![Image of coins]

How much more money does Gina need to match Leah’s total value? How do you know?
Matching Change

Count the first collection. Find the total value. Complete the second collection to match the total value of the first collection. Draw the missing coins.

1. 

37¢

2. 

Stretch Your Thinking  What is the least number of coins you can use to show 70¢? Name the coins.
Lesson 11.5

More Than One Way

You can use a list to show ways to make the same amounts using a different number of coins.

<table>
<thead>
<tr>
<th>Number of Coins</th>
<th>Quarters</th>
<th>Dimes</th>
<th>Nickels</th>
<th>Total Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>3</td>
<td>0</td>
<td>1</td>
<td>80¢</td>
</tr>
<tr>
<td>8</td>
<td>0</td>
<td>8</td>
<td>0</td>
<td>80¢</td>
</tr>
</tbody>
</table>

Show how to make the same amounts using different numbers of coins.

1. Number of Coins | Quarters | Dimes | Nickels | Total Value |
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td></td>
<td></td>
<td></td>
<td>40¢</td>
</tr>
<tr>
<td>5</td>
<td></td>
<td></td>
<td></td>
<td>40¢</td>
</tr>
<tr>
<td>7</td>
<td></td>
<td></td>
<td></td>
<td>40¢</td>
</tr>
<tr>
<td>8</td>
<td></td>
<td></td>
<td></td>
<td>40¢</td>
</tr>
</tbody>
</table>

2. Number of Coins | Quarters | Dimes | Nickels | Total Value |
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td></td>
<td></td>
<td></td>
<td>75¢</td>
</tr>
<tr>
<td>7</td>
<td></td>
<td></td>
<td></td>
<td>75¢</td>
</tr>
<tr>
<td>8</td>
<td></td>
<td></td>
<td></td>
<td>75¢</td>
</tr>
<tr>
<td>10</td>
<td></td>
<td></td>
<td></td>
<td>75¢</td>
</tr>
</tbody>
</table>

WRITE Math

Can you show a way to make 75¢ using only quarters and dimes? What about 40¢?
Lesson 12.1

Fruit Stand

Write the cost of each fruit. Name the fruit in order from least to greatest cost.

1. 
   apple  orange  banana
   [Image showing coins]
   30¢  

2. 
   grapes  pear  cherries
   [Image showing coins]

WRITE Math  Make 3 groups of coins. Find the total value of each group. Then put them in order from greatest to least value.
Name

Lesson 12.2

**Saving Coins**

Use coins to act out the problem. Draw the coins. Write the total value. Then answer the question.

1. Lynn saves 1 quarter, 1 dime, and 4 nickels. She needs 65¢ to buy a postcard. How much more money does she need?

   She needs 10¢ more.

2. Dee saves 1 half dollar, 1 dime, and 3 nickels. She needs 80¢ to buy a pen. How much more money does she need?

   She needs ____ more.

3. Tim saves 2 quarters, 1 dime, and 5 pennies. He needs 95¢ to buy a pen. How much more money does he need?

   He needs ____ more.

**Stretch Your Thinking** Write your own money problem like the ones above. Have a classmate solve it.
Changing Amounts

Add or subtract to solve.

1. Jade saved 1 quarter, 1 dime and 9 pennies. She gives 12¢ to her sister. How much money does Jade have now?

2. Nikki saved 3 dimes, 5 nickels and 5 pennies. She lends 23¢ to her friend. How much money does Nikki have now?

3. Pablo saved 1 quarter, 3 nickels, and 8 pennies. He puts 35¢ more into his bank. How much money does Pablo have now?

WRITE Math Julie wants to save 75¢. She has saved 1 quarter and 4 pennies so far. How much more money does she need to save?
On the Menu

Use the menu. Predict and test to solve.

1. Ali has these coins. He wants to spend all his money. He will buy a pretzel and another item. Which other item will he buy?

   [Coins image]

2. Sue has these coins. She wants to buy two apples and something else. Which choices does she have?

   [Coins image]

——— or ————

Stretch Your Thinking  Make a menu. Write your own problem about the menu. Then give it to a classmate to solve.
Make a Dollar

How much more money does each child need to buy the box of crayons? Draw the coins to solve.

1. Lilly has these coins.

2. Gail has these coins.

3. Tori has these coins.

4. Nick has these coins.

WRITE Math Look at Exercise 4. What other coins could you use to show your answer?
Correct Change

Find the total price. Then count on from the price to make the change.

1. Ken has 60¢. He buys a diver and a duck.
   - Total price: ______.
   - His change is ______, ______.

2. Lisa has 50¢. She buys a duck and a starfish.
   - Total price: ______.
   - Her change is ______, ______, ______.

3. Paul has 80¢. He buys a starfish and a diver.
   - Total price: ______.
   - His change is ______, ______, ______.

4. Quan has $1.00. He buys a boat and a diver.
   - Total price: ______.
   - His change is ______, ______, ______.

WRITE Math

Julie has $1.00. She buys a toy frog for 57¢.
What coins might she get back in change?
Two Hours at the Park

Jeanette is at the park with her family. They are going to spend 2 hours there. She wants to do 4 different things at the park. Which 4 things can she do in 2 hours? Circle them.

Jeanette’s family decides to stay at the park for 1 more hour. What other things can Jeanette do?
Lesson 13.2

Time Riddle

Write the time below each clock.

Stretch Your Thinking  Put the times in order from earliest to latest. Then write the letter for each time, in order, in the blanks. Solve the riddle.

Why did the boy throw a clock out the window?

TO S ___ ___ ___ ___ ___ ___ ___ ___
Lesson 13.3

Time at the Zoo

Jeremiah and his father go to the zoo. They get to the monkey house at 10:15. They spend some time watching each kind of animal. Draw the clock hands to show what time they leave each part of the zoo.

1. They watch the monkeys for 15 minutes.
2. They watch the lions for 20 minutes.
3. They watch the snakes for 5 minutes.
4. They watch the bears for 10 minutes.
5. They watch the giraffes for 20 minutes.
6. They watch the penguins for 25 minutes.

WRITE Math

After they see the penguins, Jeremiah and his father have lunch. They eat for one hour. Then they leave the zoo. What time do they leave the zoo? Write the time in two ways.

_________ minutes after _________
Annabel is making a schedule of her school day. 
Fill in the times. Name the activities in order from first to last. Then draw the hands on the clocks below.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Time</th>
<th>Clock</th>
</tr>
</thead>
<tbody>
<tr>
<td>science</td>
<td>25 minutes after 12</td>
<td></td>
</tr>
<tr>
<td>lunch</td>
<td>20 minutes before 12</td>
<td></td>
</tr>
<tr>
<td>art</td>
<td>15 minutes after 11</td>
<td></td>
</tr>
<tr>
<td>reading</td>
<td>25 minutes before 10</td>
<td></td>
</tr>
<tr>
<td>recess</td>
<td>50 minutes before 1</td>
<td></td>
</tr>
<tr>
<td>math</td>
<td>30 minutes before 11</td>
<td></td>
</tr>
</tbody>
</table>

**FIRST**

![Clocks](clock1.png)  ![Clocks](clock2.png)  ![Clocks](clock3.png)

**LAST**

![Clocks](clock4.png)  ![Clocks](clock5.png)  ![Clocks](clock6.png)

---

**Stretch Your Thinking** Make a schedule for your school day. Write the activities in order from first to last. Write the time in two ways.
Time to Estimate

Look at the activities. Make a reasonable estimate for about how long each one might take. Write your estimate. Use **hours** or **minutes**.

1. take a canoe ride
   about ____________

2. play a game of ping pong
   about ____________

3. sleep at night
   about ____________

4. eat some cereal
   about ____________

5. go on a field trip
   about ____________

6. read a poem
   about ____________

**WRITE Math**

Explain how you made your estimate for Exercise 6.

_________________________________________________________________

_________________________________________________________________

_________________________________________________________________
Lesson 13.6

Busy from A.M. to P.M.

What do you do in the A.M. hours?
What do you do in the P.M. hours?

Name 5 activities that belong in each column.

Then write a time that each activity might happen.

<table>
<thead>
<tr>
<th>A.M.</th>
<th>P.M.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>___ : ___</td>
<td>___ : ___</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>___ : ___</td>
<td>___ : ___</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>___ : ___</td>
<td>___ : ___</td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td>___ : ___</td>
<td>___ : ___</td>
</tr>
</tbody>
</table>

Are there any activities that you do in both the a.m and p.m hours? Explain.

___________________________
### Fair Time

Carla spends her day at the state fair. It takes her 5 minutes to get from one activity to the next. Circle the reasonable estimate for how long each activity takes. Then find the start and finish times.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Start Time</th>
<th>Length</th>
<th>Finish Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>fun house</td>
<td>10:00 A.M.</td>
<td>15 minutes</td>
<td>3 hours</td>
</tr>
<tr>
<td>bobbing for apples</td>
<td>11:00 A.M.</td>
<td>2 hours</td>
<td>20 minutes</td>
</tr>
<tr>
<td>hay ride</td>
<td>12:00 P.M.</td>
<td>1 minute</td>
<td>1 hour</td>
</tr>
<tr>
<td>lunch</td>
<td>1:00 P.M.</td>
<td>3 hours</td>
<td>30 minutes</td>
</tr>
<tr>
<td>petting zoo</td>
<td>2:00 P.M.</td>
<td>45 minutes</td>
<td>4 hours</td>
</tr>
<tr>
<td>animal show</td>
<td>3:00 P.M.</td>
<td>50 minutes</td>
<td>2:05 P.M.</td>
</tr>
</tbody>
</table>

Does lunch end in an A.M. hour or a P.M. hour? How do you know?
World Traveler

Alice’s Uncle Matt travels all around the world. Help Alice find out about how much time her Uncle Matt spends in each city.

Paris: about _____ months
Cairo: _____ weeks
Tokyo: about _____ days
Moscow: about _____ weeks
Johannesburg: about _____ month
Sydney: _____ weeks

WRITE Math
Was Alice’s Uncle Matt gone for more than 1 year less than 1 year, or exactly 1 year in all? Explain.

Name________________________________________

Lesson 13.8
Solid Colors

Color each type of solid figure a different color. Then color the objects below to match the color of the solid it looks like.

cube | cone | sphere | pyramid | cylinder | rectangular prism

**Stretch Your Thinking** Find an object that is like a solid figure. Draw and label it. Then draw and label the solid figure it looks like.
Lesson 14.2

Number Cube Net

This figure can fold into a solid figure.
Number the faces from 1–6.
Then trace, cut, fold, and tape the figure into a cube.

Now you have made a number cube.
With a classmate, write rules for a game.
Use the cube to play the game.

Stretch Your Thinking Draw a figure that will fold into a pyramid.
Name________________________________________

Lesson 14.3

Solid Figure Puzzle

Use the clues to fill in the puzzle.

Across

1. A solid figure which has a curved surface.

4. A __________ prism has 6 faces, 12 edges, and 8 vertices.

6. the corner where 3 or more edges meet

8. A cube has 6 ________.

10. a solid figure which has both a flat and a curved surface

Down

2. A solid figure that has 5 faces, 8 edges, and 5 vertices.

3. The surface of a cube is __________.

5. A sphere has a _________ surface.

7. this is formed where two faces meet

9. A solid figure whose faces are all the same size and shape.
Solid Figure Riddles

Use solid figures. Draw a line to match the clues to the object they tell about.

1. I am an object that has the same number of faces, edges, and vertices as a cube. My faces are not all squares.

2. I am an object that has a curved surface and a flat surface. I am not a cylinder.

3. I am an object that has a curved surface. I am not a cone.

4. I am an object that has fewer faces than a rectangular prism. I have 5 vertices.

Stretch Your Thinking  Write your own riddle using solid figures. Then have a classmate solve it.
Lesson 14.5

Take It Apart

Draw the plane figures that will make each solid figure.

1. 

2. 

3. 

4. 

WRITE Math  Look at the plane figures you drew in Exercises 2 and 4. How are they different? How are they alike?

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Making Models

Complete the table to solve.

1. Tasha wants to make models of cylinders and cones. How many circles does she need to make 5 pairs?

   Tasha needs _______ circles.

   Number of Circles on Cylinders and Cones

<table>
<thead>
<tr>
<th>number of pairs of cylinders and cones</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>3</td>
</tr>
</tbody>
</table>

   Tasha needs _______ circles.

2. Al wants to make models of pyramids and cubes. How many squares does he need to make 4 pairs?

   Al needs _______ squares.

   Number of Squares on Pyramids and Cubes

<table>
<thead>
<tr>
<th>number of pairs of pyramids and cubes</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Match Plane Figures

Color each plane figure. Use a different color for each type. Find the objects that are like each plane figure. Color each object to match.

circle  rectangle  square  triangle  trapezoid  pentagon

plate  car window  map  pot holder

yield sign  lunch box  school sign  slice of pizza

game  wheel  weight  bird house

Stretch Your Thinking  Draw a picture that uses all six plane figures above at least once. Ask a classmate to find and name the figures.
Plane Figure Puzzle

Use the clues to fill in the blanks. Then find the figure in the word puzzle below.

1. A c _ _ _ l e has no sides.
2. A _ q _ _ _e has 4 sides that are all the same length.
3. A _ e c t _ n g _ _ has 4 vertices.
4. A t _ _ _ _ g l e has fewer than 4 vertices.
5. A v _ _ _ _ x is a point where 2 sides meet.
6. A hexagon has 6 _ _ g e _.
7. A _ r a _ e _ o _ _ has the same number of sides and vertices as a rectangle.

What do you notice about the number of sides and vertices on each plane figure?
Name__________________________________________

Lesson 15.3

Two Ways to Top It

Use pattern blocks.
Find two different ways to make each figure.
Draw lines inside the figure to show your solution.

1.

2.

3.

WRITE Math  Which two plane figures can you make using 4 squares?

__________________________________________

__________________________________________
Building Figures

Use pattern blocks. Write the number of smaller figures you can use to make each larger figure.

1. ______ triangles

2. ______ triangles

3. ______ squares

4. ______ triangles

5. ______ triangles and ______ square

6. ______ trapezoid and ______ triangles

WRITE Math Look at Exercise 1. How many ways can you make a hexagon with more than one pattern block that is not a triangle?
Use the Clues

Use logical reasoning to solve.

1. Draw 2 different figures that fit these clues:
   I have fewer than 4 vertices.
   I have fewer than 4 sides.

2. Draw 3 different figures that fit these clues:
   I have 4 vertices.
   I have fewer than 6 sides.
   I am not a square.

3. Draw 5 different figures that fit these clues:
   I have more than 3 vertices.
   I have fewer than 8 sides.
   I am not a rhombus.

Stretch Your Thinking What clues could you use to describe a square, a trapezoid, and a rhombus?
From Start to Finish

Trace the starting figure. Cut it out. Follow the directions. Draw the figures.

1. Start with this figure. Turn it. Then flip it to finish.

![Triangle](triangle.png)

2. Start with this figure. Slide it. Then turn it to finish.

![Rectangle](rectangle.png)

3. Start with this figure. Flip it. Then slide it to finish.

![Triangle](triangle.png)

WRITE Math Look at the figure in Exercise 3. What would the figure look like after 2 more flips? Explain.
Figure Hunt

Shade congruent figures with the same color.

Can you cut any of the figures on this page in half to make two congruent figures? Explain.
Lesson 15.8

Half and Half

Draw two or more lines of symmetry on each figure.

Stretch Your Thinking Write your first and last name in all capital letters. How many letters in your name have symmetry? Draw a line of symmetry through each of those letters.
Patterned Scarves

Color a different repeating pattern on each scarf. Then describe the pattern.

1. 

2. 

3. 

WRITE Math: Look at Exercise 3. Describe how this is a repeating pattern.
Lesson 16.2

Gridding Patterns

Extend each pattern to fill in the grid.

WRITE Math How did you fill in the bottom right corner of the grid? Explain.
Patterned Pizzas

Select 3 toppings for each pizza. The toppings must form a repeating pattern. Draw each pattern on the pizzas.

pepperoni  tomato  olives  mushrooms  peppers

Could you create another pizza with a different pattern? Explain.
Name______________________________

**Lesson 16.4**

**Pattern Match**

Color to match each pattern unit with the correct pattern. Then complete the pattern to check your work.

1. △ □ ○ ○ △ □ ○ ○
2. △ ○ ○ □ △ ○ ○ □
3. △ □ ○ ○ △ □ ○ ○
4. △ □ ○ ○ △ □ ○ ○

**Stretch Your Thinking** Use the same 4 figures in the patterns above. Create a different pattern unit. Then repeat the pattern unit to make a new pattern.
How Does the Pattern Grow?

Draw the missing parts of each growing pattern. Describe the pattern.

1. |
   |
   |
   Each stack has ____ more bricks than the last stack.
The bricks are added ______________ each time.

2. |
   |
   |
   Each cup has 3 more straws than the last cup.
The straws are placed ______________.

3. |
   |
   |
   Each tower has ____ more blocks than the last tower.
The blocks are added ____________________

Stretch Your Thinking  Draw a growing pattern.
Field Day

Simon is in charge of the equipment at field day. He will set up the equipment for each sport in a growing pattern. He needs 4 sets of equipment for each sport. Write the missing number in each growing pattern. Draw each set of sports equipment where it belongs in the growing pattern.

1 7 10

2 4 ____ 8

____ 6 7 8

WRITE Math Each sport needs one more set. How many of each type will be in the next set?

_______ ☺️ _______ 🏖️ _______ 🏐️

EW108
Lesson 16.7

Coin Collectors

John, Gina, and Sid all start coin collections on Monday. Write the number of coins they collect. Then write the amount.

1. Sid collects 1 dime each day. How many dimes will he have on Friday?

<table>
<thead>
<tr>
<th>day</th>
<th>Monday</th>
<th>Tuesday</th>
<th>Wednesday</th>
<th>Thursday</th>
<th>Friday</th>
</tr>
</thead>
<tbody>
<tr>
<td>number of dimes</td>
<td>1</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

On Friday, Sid will have ______ dimes. How much money will Sid have on Friday? _____¢

2. Gina collects 3 nickels each day. How many nickels will she have on Friday?

<table>
<thead>
<tr>
<th>day</th>
<th>Monday</th>
<th>Tuesday</th>
<th>Wednesday</th>
<th>Thursday</th>
<th>Friday</th>
</tr>
</thead>
<tbody>
<tr>
<td>number of nickels</td>
<td>3</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

On Friday, Gina will have ______ nickels. How much money will Gina have on Friday? _____¢

3. John collects 11 pennies each day. How many pennies will he have on Friday?

<table>
<thead>
<tr>
<th>day</th>
<th>Monday</th>
<th>Tuesday</th>
<th>Wednesday</th>
<th>Thursday</th>
<th>Friday</th>
</tr>
</thead>
<tbody>
<tr>
<td>number of pennies</td>
<td>11</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

On Friday, John will have ______ pennies. How much money will John have on Friday? _____¢

WRITE Math Who will have the most money on Friday? Explain your answer.
Lesson 17.1

**Compare to Measure**

1. Alicia’s paintbrush is about 6 beans long. A crayon is about 3 beans long. About how many crayons long is the paintbrush?

   about _____ crayons

2. Bill’s watch is about 4 paper clips long. A paper clip is about 2 buttons long. About how many buttons long is the watch?

   about _____ buttons

3. Maya’s necklace is about 9 cubes long. An eraser is about 3 cubes long. About how many erasers long is the necklace?

   about _____ erasers

   The eraser is about 2 beans long. About how many beans long is Maya’s necklace? Explain.
Lesson 17.2

Best Estimate

Look around your classroom. Find an object that is about as long as the length given.

1. 10 inches

2. 3 inches

3. 7 inches

4. 1 inch

WRITE Math Explain how you found the object you drew in Exercise 3.
Lesson 17.3

Lengths of Objects

Use the object in the picture to estimate the length of another object. Draw and label the object below the picture.

1. The spoon is about 4 inches long.
   Find an object that is about 3 inches long.

   [Diagram of a spoon]

   ____________________________

2. The rope is about 2 inches long.
   Find an object that is about 7 inches long.

   [Diagram of a rope]

   ____________________________

WRITE Math How did you use the pictures to estimate?
Length Riddles
Find a real object to fit the clues. Measure the object. Then draw and label it.

<table>
<thead>
<tr>
<th>Find the object.</th>
<th>Measure it.</th>
<th>Draw and label it.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. I am longer than 5 inches but shorter than 1 foot.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. I am longer than 1 foot but shorter than 1 yard.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3. I am longer than 1 yard.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Stretch Your Thinking Write a riddle. Have a partner find an object, measure it, and draw it.
Color the Vegetables

Color the vegetables that are 10 centimeters or longer yellow. Color the vegetables that are shorter than 10 centimeters green.

Stretch Your Thinking  If you put the same-color vegetables end-to-end, which color would be longer? Explain.
Name______________________________

**Lesson 17.6**

**Centi-Meter Fever**

Find a real object that fits the clues. Measure the object. Then draw and label it.

**REMEMBER:**
A finger is about 1 centimeter across.
A meter is the same as 100 centimeters.

<table>
<thead>
<tr>
<th>Find the object.</th>
<th>Measure it.</th>
<th>Draw and label it.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.</strong> I am shorter than 10 centimeters.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>2.</strong> I am longer than 50 centimeters but shorter than 1 meter.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>3.</strong> I am longer than 1 meter.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Stretch Your Thinking** How many centimeters long is the object you drew in Exercise 3? Explain.

______________________________
______________________________
______________________________

EW115 Enrich
Draw It

1. Use a ruler. Draw two different figures that each have a perimeter of 20 centimeters.

2. Use a ruler. Draw two different figures that each have a perimeter of 12 centimeters.

WRITE Math Can a triangle and a square have the same perimeter? Explain.
Lesson 17.8

Square Units

1. Draw two figures. Make the area of one figure 4 square units less than the area of the other figure.

2. Draw two figures. Make the area of one figure 7 square units more than the area of the other figure.

3. Draw two figures. Make the area of one figure 12 square units less than the area of the other figure.

WRITE Math

Can different figures have the same area? Explain.
Name __________________________________________

Lesson 18.1

Ounces and Pounds

Laurie goes grocery shopping with her mother. She wants to find the weight of each item in ounces and in pounds. Help Laurie find the weights.

<table>
<thead>
<tr>
<th>item</th>
<th>weight in ounces</th>
<th>weight in pounds</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. bread</td>
<td>16 ounces</td>
<td>_______ pound</td>
</tr>
<tr>
<td>2. eggs</td>
<td>_______ ounces</td>
<td>1 pound</td>
</tr>
<tr>
<td>3. apples</td>
<td>48 ounces</td>
<td>_______ pounds</td>
</tr>
<tr>
<td>4. carrots</td>
<td>32 ounces</td>
<td>_______ pounds</td>
</tr>
<tr>
<td>5. watermelon</td>
<td>_______ ounces</td>
<td>4 pounds</td>
</tr>
</tbody>
</table>

How many pounds do the groceries weigh altogether?

_______ pounds
Measuring Mass

Look around your classroom. Choose two objects that could be measured in grams. Choose two objects that could be measured in kilograms. Draw and label the objects. Then measure.

<table>
<thead>
<tr>
<th>grams</th>
<th>kilograms</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td></td>
</tr>
<tr>
<td>object:</td>
<td>object:</td>
</tr>
<tr>
<td>mass: about</td>
<td>mass: about</td>
</tr>
<tr>
<td>_____ grams</td>
<td>_____ kilograms</td>
</tr>
<tr>
<td>2.</td>
<td></td>
</tr>
<tr>
<td>object:</td>
<td>object:</td>
</tr>
<tr>
<td>mass: about</td>
<td>mass: about</td>
</tr>
<tr>

</tr>
<tr>
<td>object:</td>
<td>object:</td>
</tr>
<tr>
<td>mass: about</td>
<td>mass: about</td>
</tr>
<tr>
<td>_____ grams</td>
<td>_____ kilograms</td>
</tr>
</tbody>
</table>

WRITE Math How did you decide whether the objects should be measured in grams or kilograms? Explain.

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________
Fruit Punch

Julia makes fruit punch for her birthday party. The recipe calls for different amounts of each juice. How many cups of each juice does Julia need?

1. 1 quart apple juice = _______ cups

2. 2 gallons orange juice = _______ cups

3. 4 pints cranberry juice = _______ cups

4. 2 quarts pineapple juice = _______ cups

5. 6 pints grape juice = _______ cups

WRITE Math How many cups of juice does Julia need in all? _______ cups

How many gallons of juice does Julia need in all? _______ gallons

Enrich
Capacity Search

Find a container that might hold each of these amounts. Draw and label the containers.

1. about 1 liter
2. about 5 liters
3. about 10 liters
4. about 20 liters

WRITE Math Which container was the hardest to find? Why?
Changing Temperatures

Wallace has four 70°F glasses of water on the counter. He does one of these things to each glass to change the temperature:

- puts the glass in the shade
- puts hot water in the glass
- puts ice in the glass
- puts the glass in the sun

Look at the thermometers. Write each temperature. Then write what Wallace might have done to get each new temperature.

1. ______ °F
2. ______ °F
3. ______ °F
4. ______ °F

WRITE Math How did you choose which glass Wallace might have put in the sun?
**Lesson 18.6**

**Measurement Search**

Find objects that can be measured using each of the tools below. Draw and label the objects. Then measure.

<table>
<thead>
<tr>
<th>1. cup</th>
<th>2. scale</th>
</tr>
</thead>
<tbody>
<tr>
<td>object:</td>
<td>object:</td>
</tr>
<tr>
<td>measurement:</td>
<td>measurement:</td>
</tr>
<tr>
<td>about _____ cups</td>
<td>about _____ grams</td>
</tr>
</tbody>
</table>

<table>
<thead>

<th>4. °F thermometer</th>
</tr>
</thead>
<tbody>
<tr>
<td>object:</td>
<td>object:</td>
</tr>
<tr>
<td>measurement:</td>
<td>measurement:</td>
</tr>
<tr>
<td>about _____ inches</td>
<td>about _____ °F</td>
</tr>
</tbody>
</table>

**WRITE Math** Is there more than one tool that could be used to measure a cup of water? Explain.

________________________________________

________________________________________

________________________________________

________________________________________
Make a Quilt

Follow the directions to make a quilt.

1. Color \(\frac{3}{25}\) green.
2. Color \(\frac{4}{25}\) red.
3. Color \(\frac{7}{25}\) yellow.
4. Color \(\frac{6}{25}\) blue.

Stretch Your Thinking  Use fractions to give more directions about the squares that are left. Then color to follow your directions.
Pizza Party

Kevin invited 3 friends to a pizza party. Draw and color to show how much pizza each boy ate.

1. Kevin ate \( \frac{1}{6} \) of a pizza.
2. Brad ate \( \frac{1}{2} \) of a pizza.
3. Mike ate \( \frac{1}{8} \) of a pizza.
4. Jack ate \( \frac{1}{4} \) of a pizza.

5. List the boys in order from who ate the greatest amount of pizza to who ate the least amount.

   [Blank for student to write the order]

   greatest          least

   How did you decide who ate the most pizza?

   [Blank for student to write their reasoning]
Lesson 19.3

Missing Problems

Write a fraction problem for each set of models.

1. ______________
   ______________
   ______________
   ______________
   Answer: ______________

2. ______________
   ______________
   ______________
   ______________
   Answer: ______________

3. ______________
   ______________
   ______________
   ______________
   Answer: ______________

WRITE Math

Write your own problem.

Then solve.

Two posters are the same size.
Andy paints \( \frac{1}{6} \) of one poster.
Max paints ________ of the other.
Who paints more poster?

________
Name______________________________

Lesson 19.4

Same Amounts

Color the first figure to show the fraction. Then color the same area on the second figure. Write the new fraction.

1. \[ \frac{3}{6} \]

2. \[ \frac{3}{5} \]

3. \[ \frac{2}{3} \]

4. \[ \frac{2}{8} \]

Look at Exercise 3. What fractions name the unshaded area of each figure?
Whole Pizzas

Shade the pizzas to show the fraction. Then write the number of whole pizzas.

1. \( \frac{8}{4} = \) _____ whole pizzas

2. \( \frac{9}{3} = \) _____ whole pizzas

3. \( \frac{16}{4} = \) _____ whole pizzas

4. \( \frac{18}{6} = \) _____ whole pizzas

WRITE Math

Five pizzas are each cut into 4 equal slices. What is the fraction for all of the pizza? Explain.
Three Different Parts

Look at the groups.
Write the fraction for each part.

1. 
- □ are gray
- □ are black
- □ are white

2. 
- □ are striped
- □ are spotted
- □ are white

3. 
- □ are gray
- □ are striped
- □ are black

WRITE Math Look at the figures in Exercise 3. Are the black figures more than, less than, or equal to half of the group? Explain.
## Greatest and Least

In each row, shade the box that shows the greatest number. Draw an X through the box that shows the least number.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td><img src="image1" alt="Grid" /></td>
<td>40 tens</td>
</tr>
<tr>
<td></td>
<td><img src="image2" alt="Grid" /></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td><img src="image3" alt="Grid" /></td>
<td>80 tens</td>
</tr>
<tr>
<td></td>
<td><img src="image4" alt="Grid" /></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td><img src="image5" alt="Grid" /></td>
<td>20 tens</td>
</tr>
<tr>
<td></td>
<td><img src="image6" alt="Grid" /></td>
<td></td>
</tr>
<tr>
<td>4</td>
<td><img src="image7" alt="Grid" /></td>
<td>90 tens</td>
</tr>
<tr>
<td></td>
<td><img src="image8" alt="Grid" /></td>
<td></td>
</tr>
</tbody>
</table>

### Stretch Your Thinking
Write a problem like those on this page. Ask a classmate to solve.
Lesson 20.2

Showing Numbers

Tommie has some 🟢itura. Circle the numbers he can show with his 🟢itura. Draw an X through the numbers he cannot show.

1. 🟢itura

   315 227 506

2. 🟢itura

   635 118 240

3. 🟢itura

   232 599 413

4. 🟢itura

   348 708 614

Craig has some 🟢itura. He can use them to show 427 and 381, but not 576. Draw the 🟢itura he might have.
Name __________________________________________

Lesson 20.3

Value Clues

Some friends use the digits 6, 5, and 4 to make numbers. They each use all three digits in their numbers. Use the clues. Write the numbers.

1. **JUDITH**
   - The value of the digit 6 in my number is 60.
   - The value of the digit 5 in my number is not 5.
   - My number is ______.

2. **RUSTY**
   - The value of the digit 6 in my number is 600.
   - The value of the digit 5 in my number is not 50.
   - My number is ______.

3. **SEEMA**
   - The value of the digit 6 in my number is 6.
   - The value of the digit 5 in my number is not 500.
   - My number is ______.

4. **ZAK**
   - My number is not the same as Rusty's number.
   - The value of the digit 4 in my number is 40.
   - My number is ______.

**Stretch Your Thinking** Write a number that none of the children made. Use the same digits. Then write clues for your number.
Cross-Number Puzzle

Write the missing numbers so the sentences are true. Read from left to right and from top to bottom.

70 + + 3 = 473

+ 5 + 90 = 295

3 300 + + 60 = 9

10 375 497 1 = 500

= + + =

30 + + 9 = 539

+ 500 + 60 + = 70

100 + + 9 = 179

WRITE Math Choose one of the numbers you wrote. Explain how you found it.
# Lesson 20.5

## Find the Ways

Circle ways that show the number. Cross out ways that do not show the number.

### 1. 753
- 7 hundreds 5 tens 13 ones
- 6 hundreds 15 tens 3 ones
- 6 hundreds 14 tens 13 ones

### 2. 240
- 2 hundreds 2 tens 20 ones
- 1 hundred 14 tens 10 ones
- 1 hundred 10 tens 40 ones

### 3. 631
- 5 hundreds 13 tens 1 one
- 4 hundreds 23 tens 1 one
- 6 hundreds 3 tens 11 ones

### 4. 800
- 7 hundreds 1 ten 10 ones
- 7 hundreds 10 tens 0 ones
- 7 hundreds 9 tens 10 ones

### 5. 452
- 3 hundreds 14 tens 12 ones
- 2 hundreds 50 tens 20 ones
- 0 hundreds 41 tens 42 ones

### 6. 333
- 2 hundreds 13 tens 3 ones
- 1 hundred 20 tens 33 ones
- 3 hundreds 13 tens 13 ones

---

**WRITE Math**

How much is 2 hundreds 20 tens 200 ones?

Explain your answer.
What Coins?

Use bills and coins. Make a model to show each child’s money. Then draw the bills and coins.

1. Patrick has $3.54. He has 3 dollar bills and 6 coins.

2. Oliver has $2.15. He has 2 dollar bills and 6 coins.

3. Luke has $1.22. He has 1 dollar bill and 5 coins.

4. Amy has $2.41. She has 2 dollar bills and 4 coins.

Stretch Your Thinking  Tessa has the same amount of money as Amy. She has 2 dollar bills and 5 coins. What coins could Tessa have?
Name__________________________

Lesson 21.1

More or Less

Sofia shows some numbers using

Use to model the number. Then write the number.

1. Sofia uses 5 blocks to show these numbers.
   She uses one .
   a number greater than 135 | a number less than 110
   ______ | ______

2. Sofia uses 7 blocks to show these numbers.
   She uses one .
   a number greater than 600 | a number less than 100
   ______ | ______

3. Sofia uses 9 blocks to show these numbers.
   She uses one .
   a number greater than 750 | a number less than 120
   ______ | ______

WRITE Math How did you find the numbers you wrote in the first part of Exercise 3? Explain.

__________________________________________________________
**Greater, Less, or Equal?**

Write each digit once to make numbers that will make the sentences true.

<p>| | | | | | | | | | |</p>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**WRITE Math**
Write a digit to make the sentence true.

___64 > 890

Is there more than one digit you could use? Explain.
The Middle of the Train

Write each number in a train car. Use each number only once. Make sure each set of cars is in the right order.

293 764
 752 760
 294 292
 382 808
 810 250
 204 491
 238 902
 453 900

Which number could have been used in more than one car? Explain.
### Hundreds of Points

Five friends played a board game. Use the clues to find how many points each player scored. Complete the table.

<table>
<thead>
<tr>
<th>Player</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nita</td>
<td></td>
</tr>
<tr>
<td>Ellen</td>
<td></td>
</tr>
<tr>
<td>Sal</td>
<td></td>
</tr>
<tr>
<td>Maurice</td>
<td></td>
</tr>
<tr>
<td>James</td>
<td></td>
</tr>
</tbody>
</table>

1. Nita scored fewer points than Sal.
2. Ellen scored more points than Sal. but fewer points than James.
3. Nita scored more points than Maurice.
4. James scored 409 points.
5. Maurice scored 398 points.

Name the players in order from who scored the most points to who scored the fewest points.
Lesson 21.5

Count by Fives, Count by Tens

Count by fives going across.
Count by tens going down.
Write the missing numbers.

1. 2.

3. 905

4. 785 5. 800

WRITE Math
Beth starts at 365 and counts by tens.
Does she say the number 402? Explain?
**Hundreds in Your Head**

Read the clues. Find the number.

1. A number is 2 hundreds more than 346. What is the number? ___________

   546

2. A number is 5 hundreds more than 219. What is the number? ___________

3. A number is 400 more than 153. What is the number? ___________

4. A number is 300 more than 543. What is the number? ___________

5. A number is 6 hundreds more than 181. What is the number? ___________

6. A number is 2 hundreds more than 263. What is the number? ___________

7. 789 is 400 more than a number. What is the number? ___________

8. 812 is 300 more than a number. What is the number? ___________

---

**Stretch Your Thinking**  Think of a 3-digit number. Write a clue that can be used to find your number.

______________________________
Lesson 22.2

Scrambled Digits

Use each set of digits to make an addition problem. Make sure you have to regroup the ones to add. Then solve.

1. 2 3 4 6 1 2

2. 2 1 3 7 2 4

3. 9 1 3 3 4 4

4. 6 5 3 1 4 2

WRITE Math

Look at your numbers in Exercise 4. How did you make sure you would need to regroup ones?
Name ________________________________

Lesson 22.3

3-Digit Decisions

Fill in the missing digits.

<table>
<thead>
<tr>
<th>Hundreds</th>
<th>Tens</th>
<th>Ones</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>7</td>
<td>5</td>
</tr>
<tr>
<td>3</td>
<td>9</td>
<td>4</td>
</tr>
</tbody>
</table>

1. \[ \begin{array}{ccc} \hline 1 & 7 & 5 \\ \hline 3 & 9 & 4 \end{array} \]

2. \[ \begin{array}{ccc} \hline 1 & & \ \\ \hline 6 & 2 & \end{array} \]

3. \[ \begin{array}{ccc} \hline & & 1 \\ \hline 5 & 0 & 3 \end{array} \]

4. \[ \begin{array}{ccc} \hline 1 & 3 & \ \\ \hline 5 & 2 & 9 \end{array} \]

5. \[ \begin{array}{ccc} \hline 8 & 0 & \ \\ \hline 9 & 9 & 3 \end{array} \]

6. \[ \begin{array}{ccc} \hline & & 1 \\ \hline 2 & 5 & 8 \end{array} \]

7. \[ \begin{array}{ccc} \hline 1 & 1 & 3 \\ \hline 8 & 4 & 1 \end{array} \]

8. \[ \begin{array}{ccc} \hline 1 & 1 & 4 \\ \hline 7 & 0 & 0 \end{array} \]

9. \[ \begin{array}{ccc} \hline & & 7 \\ \hline & & 8 \end{array} \]

WRITE Math

Look at Exercise 9. How did you find the missing numbers? Explain.
**What Are the Numbers?**

Write what the original addition problem could be for each estimated sum. Give two possibilities. Round the addends up in one problem and down in the other.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>

<td>700</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td></td>
<td></td>
<td>800</td>
</tr>
</tbody>
</table>

**WRITE Math** Explain how you found one addend that rounds up to 100 and one addend that rounds down to 100 in Exercise 3.
Use Information

Write a question about each set of information.
Cross out the information you do not need.
Then answer the question.

1. There are 57 turtles sleeping in the mud.
   There are are 90 turtles playing in the river.
   There are 86 elephants playing in the river.

   ______________________________________________________________________

   ______________________________________________________________________

2. Alexander has 155 blue buttons in a bowl and 211 blue buttons in a box. He has 245 red buttons in the bowl and 196 red buttons in the box.

   ______________________________________________________________________

   ______________________________________________________________________

   ______________________________________________________________________

   ______________________________________________________________________

Stretch Your Thinking  Write a different question about the information in Exercise 3. Ask a classmate to solve it.
Lesson 23.1

How Many Hundreds?

Count back to find how many hundreds were subtracted. Write the number of hundreds in the box.

1. 836 – 6 hundreds = 236

2. 452 – 152

3. 612 – 212

4. 948 – 248

5. 324 – 124

6. 781 – 281

7. 563 – 263

8. 819 – 219

WRITE Math

Look at Exercise 8. What if the difference was 119? Would the number you write in the box be greater or smaller? Explain.
**Lesson 23.2**

**Disappearing Digits**

Write the missing digits.  
Show the regrouping if there is any.

Use Workmat 5 and if you need to.

<p>| | | | | | | |</p>
<table>

</tr>
</tbody>
</table>

**WRITE Math** Look at Exercise 8. How did you find the missing digits? Explain.
**Regroup Tens and Hundreds**

Use the numbers in the boxes to fill in the subtraction problems. Use each number only once in each problem. Then solve the problems.

1. \[
\begin{array}{cccc}
6 & 3 & 1 & 6 \\
\text{regroup tens only} & \text{regroup hundreds only} & \text{regroup tens and hundreds} \\
\hline
\text{Hundreds} & \text{Tens} & \text{Ones} & \text{Hundreds} & \text{Tens} & \text{Ones} & \text{Hundreds} & \text{Tens} & \text{Ones} \\
8 & 9 & & 8 & 9 & & 9 & 8 & \\
\end{array}
\]

2. \[
\begin{array}{cccc}
9 & 2 & 9 & 3 \\
\text{regroup tens only} & \text{regroup hundreds only} & \text{regroup tens and hundreds} \\
\hline
\text{Hundreds} & \text{Tens} & \text{Ones} & \text{Hundreds} & \text{Tens} & \text{Ones} & \text{Hundreds} & \text{Tens} & \text{Ones} \\
7 & 5 & & 7 & 5 & & 7 & 5 & \\
\end{array}
\]

**WRITE Math**

Look at the third problem in Exercise 2. Could you have written the digits in different places? Explain.

---

**EWI48**
Keeping Track

You have $5.50.
Add and subtract to keep track of your money.

1. You spend $1.69 on a coloring book.

2. Your sister gives you 8 dimes.

3. You give your brother 3 quarters.

4. You get $2.27 from your father.

5. You find 2 quarters, 4 nickels, and 8 pennies in your jacket.

6. You spend $2.47 on a present for your mother.

WRITE Math What is the difference between the amount you started with and the amount you ended with?
Solve each triple step problem. Do one step at a time. Add or subtract to solve.

1. Jay has $6.90. He buys 2 toy drums. Each drum costs $1.75. Then he buys a burrito for $2.25. How much money does Jay have left?

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Step 2</th>
<th>Step 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jay has _____ left.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. Quinn and Jenna each have $2.65. They spend $3.10 on a sandwich to share. How much more money do they need to buy another sandwich?

<table>
<thead>
<tr>
<th>Step 1</th>
<th>Step 2</th>
<th>Step 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quinn and Jenna need _____ more.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Stretch Your Thinking Write your own triple step problem. Have a classmate solve.
Estimate to Check

Carson solved these subtraction problems. Estimate to check his answers. If an answer does not make sense, correct Carson’s mistake.

1. \[ \begin{array}{c}
295 \\
-181 \\
\hline
114 
\end{array} \]

2. \[ \begin{array}{c}
405 \\
-317 \\
\hline
188 
\end{array} \]

3. \[ \begin{array}{c}
789 \\
-602 \\
\hline
87 
\end{array} \]

4. \[ \begin{array}{c}
892 \\
-803 \\
\hline
89 
\end{array} \]

5. \[ \begin{array}{c}
687 \\
-494 \\
\hline
293 
\end{array} \]

6. \[ \begin{array}{c}
794 \\
-208 \\
\hline
486 
\end{array} \]

WRITE Math
How did you solve Exercise 6?
Skip-Counting

Draw equal groups. Skip-count to solve.

1. How many toes are there on 4 feet?
   
   5, 10, 15, 20
   
   There are 20 toes on 4 feet.

2. How many sides are there on 3 hexagons?
   
   _________________
   
   There are ___ sides on 3 hexagons.

3. How many wheels are there on 6 cars?
   
   ___________________
   
   There are ___ wheels on 6 cars.

4. How many vertices are there on 7 triangles?
   
   ___________________
   
   There are ___ vertices on 7 triangles.

---

Stretch Your Thinking  Write your own problem like the ones on this page. Give it to a classmate to solve.

_____________________________
A Skip-Counting Discovery

Skip-count to find how many in all. Write the multiplication sentence. Tell if the product is **odd** or **even**.

1. Multiply two even numbers.
   - \( 2 \times 2 = 4 \)
   - The product is **even**.
   - \( ___ \) \( ___ \) \( ___ \)
   - The product is ______.

2. Multiply two odd numbers.
   - \( ___ \) \( ___ \) \( ___ \)
   - The product is ______.
   - \( ___ \) \( ___ \) \( ___ \)
   - The product is ______.

3. Multiply an even number and an odd number.
   - \( ___ \) \( ___ \) \( ___ \)
   - The product is ______.
   - \( ___ \) \( ___ \) \( ___ \)
   - The product is ______.

**WRITE Math**

When is a product odd? When is it even?
Lesson 24.3

Make a BIG Array

Find each product. Draw all of the arrays on the grid. Use a different color for each array.

1. $1 \times 6 = \underline{6}$

2. $3 \times 7 = \underline{\hspace{2cm}}$

3. $5 \times 3 = \underline{\hspace{2cm}}$

4. $3 \times 6 = \underline{\hspace{2cm}}$

5. $4 \times 4 = \underline{\hspace{2cm}}$

6. $2 \times 7 = \underline{\hspace{2cm}}$

WRITE Math

What is the product if this entire grid was one array? Explain.

____________________

____________________
How Many Vertices?

Write a multiplication sentence to show how many vertices there are in each group of figures.

Use the same color to color the groups that have the same number of vertices.

Stretch Your Thinking Which group of figures would have the same number of vertices as 6 triangles? Explain.
Lunch Time

Use the picture to write a multiplication sentence.

1. ____________ ____________ ____________ ____________ bagels

2. ____________ ____________ ____________ grapes

3. ____________ ____________ ____________ apples

4. ____________ ____________ ____________ pretzels

Stretch Your Thinking Write a story problem for one of the pictures above. Then write the multiplication sentence for it. Solve.

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
Write Your Own

Complete the number sentence. Then complete each word problem. Draw a picture to go with it.

1. $9 + 2 = ____$
   Ayanna has 9 boxes. __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________ __________ boxes

2. $9 - 2 = ____$
   Sylvie has 9 boxes. __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________

3. $9 \times 2 = ____$
   Johan has 9 boxes. __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________
   __________________________ __________ marbles

Look at Exercise 3. How did you decide which kind of problem to write?

__________________________

__________________________

__________________________
**Lesson 24.7**

**Are There Any Left?**

Use Workmat 6 and ●. Write **yes** or **no**.

<table>
<thead>
<tr>
<th>Use this many ●</th>
<th>Can you make 2 equal groups with none left over?</th>
<th>Can you make 3 equal groups with none left over?</th>
</tr>
</thead>
<tbody>
<tr>

Lesson 24.8

A Parade

The second grade classes will march in a parade. Each teacher must divide his or her class into 2 or 3 rows. Each row must have the same number of children. Use ● to help you.

1. Mrs. Jones has 18 children.
   ____ rows of ____ children

2. Mrs. Kelly has 14 children.
   ____ rows of ____ children

3. Mr. Lennon has 20 children.
   ____ rows of ____ children

4. Ms. Ryan has 12 children.
   ____ rows of ____ children

5. Ms. Howe has 15 children.
   ____ rows of ____ children

6. Mr. Flynn has 21 children.
   ____ rows of ____ children

What if the children in Mr. Lennon’s class were put into 3 rows, would there be an equal number of children in each row? Explain.

Lesson 24.9

Division Puzzles

Each exercise has four division sentences.
Two go from left to right.
The other two go from top to bottom.
Write the missing numbers. Use the number line to help.

1. \[ 12 \div 6 = \_ \quad \_ \div 2 = \_ \]

2. \[ 18 \div 9 = \_ \quad \_ \div 2 = \_ \]

3. \[ 16 \div \_ = 4 \quad 8 \div 2 = \_ \]

4. \[ \_ \div 10 = 2 \quad 4 \div 2 = \_ \]

Stretch Your Thinking  Look at the problems above.
Write a new problem using the same design. Put 24 in
the top left corner. Ask a classmate to solve.
